

Welcome to [E-XFL.COM](https://www.e-xfl.com)

Understanding [Embedded - DSP \(Digital Signal Processors\)](#)

[Embedded - DSP \(Digital Signal Processors\)](#) are specialized microprocessors designed to perform complex mathematical computations on digital signals in real-time. Unlike general-purpose processors, DSPs are optimized for high-speed numeric processing tasks, making them ideal for applications that require efficient and precise manipulation of digital data. These processors are fundamental in converting and processing signals in various forms, including audio, video, and communication signals, ensuring that data is accurately interpreted and utilized in embedded systems.

Applications of [Embedded - DSP \(Digital Signal Processors\)](#)

Details

Product Status	Active
Type	Fixed Point
Interface	I ² C, SPI
Clock Rate	130MHz
Non-Volatile Memory	ROM (160kB)
On-Chip RAM	256kB
Voltage - I/O	1.8V, 3.3V
Voltage - Core	1.20V
Operating Temperature	0°C ~ 70°C (TA)
Mounting Type	Surface Mount
Package / Case	-
Supplier Device Package	20-WLP
Purchase URL	https://www.e-xfl.com/product-detail/cirrus-logic/cs48l10-cwzr

Audio	02
Energy	14
Industrial	18
Apex Precision Power®	22
Communication	28
Product Number Index	30

Product Summary

2012 Cirrus Logic Product Summary

First choice in high-precision analog + digital signal processing components for the audio + energy markets.

Cirrus Logic, Inc. and its subsidiaries ("Cirrus") believe that the information contained in this document is accurate and reliable. However, the information is subject to change without notice and is provided 'as is' without warranty of any kind (express or implied). Customers are advised to obtain the latest version of relevant information to verify, before placing orders, that information being relied upon is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgment, including those pertaining to warranty, indemnification, and limitation of liability. No responsibility is assumed by Cirrus for the use of this information, or for infringement of patents or other rights of third parties. This document is the property of Cirrus and, by furnishing this information, Cirrus grants no license, express or implied, under any patents, mask work rights, copyrights, trademarks, trade secrets, or other intellectual property rights. No part of this publication may be copied, reproduced, stored in a retrieval system, or transmitted, in any form or by any means (electronic, mechanical, photographic, or otherwise) unless distributed in its entirety with all copyright notices attached. No part of this publication may be used as a basis for manufacture or sale of any items without the prior written consent of Cirrus.

Certain applications using semiconductor products may involve potential risks of death, personal injury, or severe property or environmental damage ("critical applications"). Cirrus products are not designed, authorized, or warranted to be suitable for use in products surgically implanted into the body, automotive safety or security devices, life-support products or other critical applications. Inclusion of Cirrus products in such applications is understood to be fully at the customer's risk and Cirrus disclaims and makes no warranty of merchantability and fitness for particular purpose, with regard to any Cirrus product that is used in such a manner. If the customer uses or permits the use of Cirrus products in critical applications, customer agrees, by such use, to fully indemnify Cirrus, its officers, directors, employees, distributors and other agents from any and all liability, including attorneys' fees and costs, that may result from or arise in connection with these uses.

Cirrus Logic, Cirrus, Apex, Apex Precision Power, Band Xpander, CLIDE (Cirrus Logic Integrated Development Environment), Cirrus Bass Enhancement (CBE), Cirrus Dynamic Volume Leveler (DVL), Cirrus Virtualizer Technology (CVT), CobraCAD, CobraCom, CobraNet, Crystal LAN, DSP Composer, DSP Condenser, DSP Conductor, Entertainment Processors, EXL Core, Extreme-S, Intelligent Room Calibration, MaverickCrunch, MaverickKey, Micro Condenser, Multipath, Optimal Integration, PacketPage, Popguard, Single-S, Total-S, Cirrus Logic framework, Cirrus Extended Surround, and the Cirrus Logic logo designs are the trademarks of Cirrus Logic, Inc. All other brand and product names in this document may be trademarks or service marks of their respective owners.

A Leader In Innovative Audio ICs

Audio Components

Cirrus Logic is a recognized leader in analog and mixed-signal audio converter ICs and audio processors that enable today's new consumer, professional and automotive entertainment products. Our products include analog-to-digital converters ("ADCs"), digital-to-analog converters ("DACs"), codecs that integrate ADCs and DACs into a single IC, digital interface ICs (eg. "S/PDIF" receivers), Class D digital amplifier controllers and power stages and audio DSPs. Our products are featured in a wide array of consumer applications, including smartphones, tablets, portable media players, soundbars, complete home theater systems, set-top boxes, gaming devices, sound cards and digital TVs. Applications for products within professional markets include digital mixing consoles, multitrack digital recorders and effects processors, and applications for products within automotive markets include amplifiers, satellite radio systems and multispeaker car audio systems.

Algorithm & Nomenclature Abbreviations

Decoding Algorithm & Nomenclature Abbreviation Table	
AAC = MPEG-2 AAC Multichannel Low Complexity	DTSLBR = DTS Express
CBR = Constant Bit Rate	DTSMA = DTS® Master Audio
DD = Dolby Digital®	ES = Elementary Stream
DD+ = Dolby Digital Plus	HE-AAC = MPEG-4 AAC Multichannel Low Complexity
DDCE = Dolby Digital Consumer Encoder (5.1 Channel)	MP3 = MPEG 1, Layer II & III CBR & VBR
DDEX = Dolby Digital EX®	MPEG = MPEG 2, Layer II Stereo & Multichannel
DTHD = Dolby® TrueHD	PES = Packetized Elementary Stream
DTS = DTS Digital Surround™	PP = Post-Processing
DTS96 = 96 kHz/24-bit	PULSE = Dolby Pulse (MPEG-4 AAC Multichannel Low Complexity Decoder with Metadata Support)
DTSENC = DTS Digital Surround Encoder (5.1 Channel)	STCR = Dolby Stereo Creator
DTSES = DTS-ES™ Matrix/Discrete	VBR = Variable Bit Rate
DTSHRA = DTS® High-Resolution Audio	

Post-Processing (PPI) Inclusion & Algorithm Abbreviation Table	
APP = Advanced Post-Processor	DVS = Dolby Virtual Speaker® 2
BXR = Cirrus Band Xpander™	L7 = Logic7™
CBE = Cirrus Bass Enhancement	LIM = Compressor/Limiter
CBM = Cross-Bar Mixer	NEO = DTS Neo:6™
CSHP = SRS Circle Surround Headphone (includes SRS HP 360° & Circle Surround)	NER = DTS Neural Surround
CVT = Cirrus Virtualization Technology	PEQ = Parametric EQ
DH = Dolby Headphone® 2	PL = Dolby® Pro Logic®
DVL = Cirrus® Dynamic Volume Leveler	PLII = Dolby Pro Logic II
DVOL = Dolby Volume	PLIIX = Dolby Pro Logic® IIx
DVOLMC = Dolby Volume Multichannel	PLZZ = Dolby Pro Logic IIz
REEQ = THX Cinema Re-EQ™	TSXT = SRS® TruSurround XT®
SPP = Stand Post-Processory	TUX = THX Select2/Ultra2™ Surround EX
TB = SRS TruBass®	TV = SRS TruVolume®
TC = Tone Control	TVMC = SRS TruVolume Multichannel
TEX = THX Surround EX™	WOW = SRS® WOW™
THX = THX® Cinema	WOWHD = SRS WOW HD™
TSHD = SRS TruSurround® HD/HD4	

Post-Processing (PP2 includes all of the above +) Inclusion & Algorithm Abbreviation Table	
AUD = Audistry®	DYNVOL = Audyssey Dynamic Volume® / Dynamic EQ®
AUDY = Audyssey® MultEQ XT™	TUX+ = THX Select2/Ultra2™ Surround EX™ with Loudness Plus

Audio DSP Tools

Features

DSP Composer	DSP Composer™ is a graphical tool supporting drag-and-drop design of custom audio signal flows. Users of this tool can create custom audio processing firmware for any of the DSP IC Families without writing custom DSP code, by combining choices from a large selection of existing audio processing primitive elements. DSP Composer also provides run-time control of firmware parameters, both for custom processing blocks and for Cirrus Logic supplied processing blocks.
CLIDE	The Cirrus Logic Integrated Development Environment (CLIDE™) is an Eclipse-based workbench supporting development of custom code for Cirrus Logic DSPs. CLIDE encapsulates many of the other available programming tools, including: assembler; linker; C compiler; debugger; and simulator. CLIDE also includes a set of wizards to aid in the creation of different forms of DSP projects, such as custom ULDs and custom Composer primitives.
DSP Condenser	DSP Condenser™ is a set of tools and a methodology to support creation of a complex AVR or soundbar application using Cirrus Logic multi-core DSPs. The tool set includes tools for defining the firmware and configuration settings for all DSP firmware to be supported by the application, plus sample microcode (written in C) for controlling the DSP. The DSP Condenser tool set "condenses" the output of multiple DSP Composer projects into a single flash image that is then managed by the DSP operating system (OS).
Micro Condenser	Micro Condenser™ is a set of tools and a methodology to support creation of flash image containing firmware and configuration settings for a single-core or multi-core DSP. The tool set includes sample microcode (written in C) for controlling the DSP.
C Compiler	The Cirrus C Compiler (CCC) is an ISO-compliant C compiler with ISO-recommended enhancements for supporting DSP architectures, including: support for fixed point arithmetic types; and support for separate memory spaces.
CDB-MCU-DEBUG Board	The CDB-MCU-DEBUG Rev B board is a USB based debug interface that enables a customer to debug/tune the end product using the Cirrus Logic tools such as CLIDE and DSP Composer.

CobraNet System Modules

Product	Description	CobraNet® Part Numbers	Audio Channels over Ethernet (full-duplex)	Serial Input/Output Ports	Ethernet Interface	Integrated DSP (MIPS)	Board Dimensions
CM-1	Digital audio network interface module with dual Ethernet ports	See your Cirrus Logic sales representative for available models.	32	Quad synchronous, up to 32 channels at 48 and/or up to 96 kHz sample rates	100BASE-Tx, 100 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u	—	3.5" X 3.5"
CM-2	Digital audio network interface module with dual Ethernet ports and audio DSP (available as a reference design)	CPB181012-CM2, CPB181022-CM2, CPB496122-CM2, (all available with female-bottom or male-top headers)	16	Quad synchronous, capable of supplying up to 16 full-duplex channels at 48 kHz sample rate or up to 8 full-duplex channels at 96 kHz sample rate	100BASE-Tx, 100 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u	32-bit DSP, 120 MIPS	3.5" X 3.5"
EV-2	CobraNet development platform for use with the CM-1 and CM-2 modules	CDB-496122-EV2	16	One digital AES3 input stream (two channels) or one digital AES3 output stream (two channels). Two analog audio input channels, two analog audio output channels	100BASE-Tx, 100 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u	32-bit DSP, 120 MIPS	8" X 7"
CobraCom Reference Design	CobraNet microphone and network-powered loudspeaker reference design	CRD-CobraCom Reference Design	16	Using the CS4961xx series provides up to 16 audio channels with audio DSP capability	100BASE-Tx, 100 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u and 802.3af Power-over-Ethernet	32-bit DSP, 120 MIPS	5.4" X 4"
CobraNet LE Reference Design	Low-cost, 2 channel I/O end-node reference design	Available direct from Attero Tech www.atterotech.com	2	Stereo 1/8" input and output, stereo RCA input and output, I²S digital audio outputs	100Base-Tx, 10 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u and 802.3af Power-over-Ethernet	—	5" x 3"

CobraNet Transport and Audio Network Processor ICs

Family	Description	CobraNet® Part Numbers	Audio Channels over Ethernet	Serial Input/Serial Output Ports	Ethernet Interface	IC Package
CS1810xx CS4961xx*	The CS1810xx Family contains CobraNet networked digital audio interface ICs. The CS4961xx Family provides digital audio signal processing along with the network interface function.	CS181002 CS496102*	2	One synchronous, capable of supplying up to 2 full-duplex channels at 48 and/or up to 96 kHz sample rates.	Supports 100BASE-Tx, 100 Mbps, full duplex Ethernet, fully compliant with IEEE 802.3u.	144 LQFP
		CS181012 CS496112*	8	Quad synchronous, capable of supplying up to 8 full-duplex channels at 48 and/or up to 96 kHz sample rates.		
		CS181022 CS496122*	16	Quad synchronous, capable of supplying up to 16 full-duplex channels at 48 kHz, or up to 8 channels at 96 kHz sample rates.		

*The CS4961xx series includes a 32-bit, 120 MIPS digital signal processor for audio processing of any or all channels.

CobraNet Software Tools

Features

DSP Conductor	DSP Conductor software is a powerful, graphical tool for rapid, drag-and-drop audio signal processing firmware development on CS4961xx-based platforms, such as the CM-2 module or an OEM's custom hardware. Drawing upon a comprehensive library of DSP functions, an OEM can design the audio processing of a product, then lock the DSP firmware down into the CS4961xx-based CobraNet product. These audio functions can be controlled either by the product's user interface or through remote SNMP commands over the CobraNet Ethernet LAN. Further, any CS4961xx node can be re-programmed in real-time from a PC on the network, enabling multi-purpose products to serve different audio processing functions for different applications at the push of a button.
CobraCAD	CobraCAD software is a graphical, drag-and-drop design and verification tool for modeling a network of CobraNet-enabled gear and standard Ethernet switches. A library of commercially available, CobraNet-enabled products is the place to start for designing a virtual CobraNet network, then making sure it will perform as required. CobraCad™ software is ideal for consultants and integrators preparing a bid for a client and for installers and expert end users who need to visualize the network before or after deployment.
CobraNet Discovery	CobraNet Discovery is a CobraNet network maintenance utility that automatically discovers CobraNet devices on the network, configures them and queries and reports the working state of a CobraNet network and its devices. Discovery also provides a CobraNet firmware update function.

Audio A/D Converters

Part Number	Resolution (bits)	Dynamic Range (dB)	THD+N (dB)	Sample Rate (kHz)	Analog Inputs	Power Supply (V)	Comments	Package

Energy Measurement and Power Management Products

Energy Solutions

For over a decade, Cirrus Logic has been a proven leader in the energy metering and monitoring market. Combining advanced Delta-Sigma technology with expert digital signal processing, Cirrus Logic offers a broad product family with superior performance to support a wide variety of application requirements.

Enabled by Cirrus Logic's EXL Core[®] architecture, the CS1501 and CS1601 series of digital PFC controllers intelligently solve power management challenges, allowing for smaller total solution size and better efficiency and THD across load conditions. Ideal for power supplies up to 300 W, applications include commercial lighting, digital TV, notebook adapters, desktops and servers.

Cirrus Logic has set the standard for seismic ICs — including complete data acquisition system solutions of best-in-class single-sensor and multi-sensor chipsets. Cirrus Logic's products for energy exploration applications include hydrophone and geophone amplifiers, high-fidelity Delta-Sigma modulators, and seismic digital filters plus test DAC.

Solving the challenges in the LED lighting market is the newest conquest in energy products from Cirrus Logic. Through the unique digital algorithms within TruDim™ technology, a new lineup of digital LED controllers has effectively solved the LED lamp's most glaring challenge: dimmer compatibility. Cirrus Logic's 1610 LED controllers have been tested to provide near 100 percent dimming compatibility with a wide variety of dimmers representing the vast majority of the installed base. New LED controller products coming in 2012 will also help LED manufacturers improve LED color temperature quality and focus on system cost reduction.

High-Precision Analog & Mixed-Signal ICs & Processors

Industrial Components

Cirrus Logic high-precision analog and mixed-signal ICs for industrial measurement applications — such as industrial process control, analytical instruments and consumer utility — are based on proprietary advanced Delta-Sigma technology. Cirrus Logic provides many proprietary products, including analog-to-digital converters, digital-to-analog converters, modulator and amplifier ICs, and ARM9-based system-on-chip processors.

Apex Precision Power[®] Products

Apex Precision Power is the technology inside Cirrus Logic's high performance power analog family of products. This technology drives the design innovation for Cirrus Logic's linear power operational amplifiers, pulse width modulation (PWM) amplifiers, and precision voltage references (VRE). Product form factors include monolithic ICs, board-level "open frame" modules, and traditional hybrid designs that can deliver up to 50 A of continuous output current and voltage supply operation ranging from 8.5 V to 1200 V. Target applications focus on the high power precision control of current, voltage and speed for the industrial, test and measurement, aerospace-defense, and medical markets.
