## What is "[Embedded - Microcontrollers](#)"?

"[Embedded - Microcontrollers](#)" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

## Applications of "[Embedded - Microcontrollers](#)"

### Details

|                            |   |
|----------------------------|---|
| Product Status             | Obsolete  |
| Core Processor             | F <sup>2</sup> MC-8FX   |
| Core Size                  | 8-Bit   |
| Speed                      | 16MHz   |
| Connectivity               | I <sup>2</sup> C, LINbus, SIO, UART/USART   |
| Peripherals                | LVD, POR, PWM, WDT  |
| Number of I/O              | 58  |
| Program Memory Size        | 60KB (60K x 8)  |
| Program Memory Type        | FLASH   |
| EEPROM Size                | -   |
| RAM Size                   | 2K x 8  |
| Voltage - Supply (Vcc/Vdd) | 2.88V ~ 5.5V  |
| Data Converters            | A/D 12x8/10b  |
| Oscillator Type            | External  |
| Operating Temperature      | -40°C ~ 85°C (TA)   |
| Mounting Type              | Surface Mount   |
| Package / Case             | 64-LQFP   |
| Supplier Device Package    | 64-LQFP (10x10)   |
| Purchase URL               | <a href="https://www.e-xfl.com/product-detail/infineon-technologies/mb95f818knpmc1-g-sne2">https://www.e-xfl.com/product-detail/infineon-technologies/mb95f818knpmc1-g-sne2</a> |

## Consumer and Industrial MCU Family

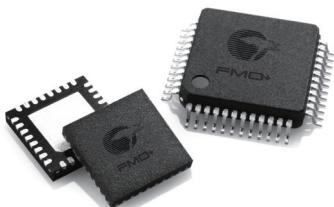

### FM4 FAMILY

Cypress ARM® Cortex®-M4F microcontroller family is a high range line providing maximum CPU frequency of 200MHz, a high speed flash memory with DSP and FPU hardware instructions. Customers can select the best fitting device from a range of products, coming in packages from 48 pin to 216 pin and flash memory densities between 256KB and 2MB. The wide operation supply voltage range up to 5.5V which improves the signal to noise ratio, results in a robust design and is unique among Cortex-M4F microcontroller families. The MCUs are designed for applications that require advanced, high-speed computing performance such as general-purpose inverters, servomotors, PLCs and other industrial equipment, as well as inverter-based home appliances such as washing machines and air conditioners.

### FM3 FAMILY

Cypress ARM Cortex-M3 microcontroller family is a scalable platform for many industrial applications. Customers can select the best fitting device from a range of products, coming in packages from 32 pin to 176 pin and flash memory densities between 32KB and 1MB. With a maximum CPU frequency of 144MHz and high speed flash memory, FM3 supports the fastest ARM Cortex-M3 devices on the market. The wide operation supply voltage range up to 5.5V, which improves the signal to noise ratio, results in a robust design and is quite unique among Cortex-M3 microcontroller families. The FM3 MCU family is split into four groups: high performance, basic, low power and ultra low leakage groups. The main differences between the groups are CPU operation frequency and supply voltage. All products are based on the same architecture (software compatible), use the same peripherals and are pin compatible in most cases. The ultra low leakage line products are based on an optimized low leakage process technology. Development tools and evaluation boards are offered from different vendors and Cypress.

### FMO+ FAMILY

The Cypress FMO+ family, which is based on the ARM Cortex-M0+ core, is designed for low power and cost-sensitive applications such as white goods, sensors, meters, HMI systems, power tools and Internet of Things (IoT) battery powered or energy harvesting wearable devices. These microcontrollers can be easily embedded into systems adopting 8-, 16- or 32-bit MCUs, accelerating product development and reducing development costs. The FMO+ family includes two groups for ultra-low-power and cost-effective applications. The devices in the ultra-low-power group have an operating voltage range of 1.65V to 3.6V, and a maximum CPU clock frequency of 40MHz, a RUN mode current of 70 µA/MHz, an RTC mode current of 0.7 µA and wake-up time of approximately 40 µs.

### 8FX FAMILY

Cypress 8FX MCU family is a high-performance 8-bit microcontroller utilizing a different embedded flash memory size. This series uses the F2MC-8FX CISC CPU, which offers industry leading class performance of an 8-bit microcontroller unit enabling more instructions to be executed per cycle. On top of delivering industry class performance MCUs, the 8FX family also delivers low power efficient MCU products for the customer's usage. This series also features a variety of on-chip timers, A/D converters, analog and digital peripheral and communication interfaces such as LIN-UART (Local Interconnect Network Universal Asynchronous Receiver-Transmitter), CAN (controller area network) and I2C (Inter-Integrated Circuit) interface for various application usages. For easy development, the 8FX family also employs a 1-line on-chip debug that uses only one pin on the microcontroller, thereby minimizing the number of pins used for debugging in product development. Cypress also provides easy to use and cost competitive development starter kits and development environments for this MCU series.

# FM4 Family – 32bit Microcontrollers

| Series Name       | Product Name | Maximum Internal Clock Frequency [MHz] | Package [pin] | Operating Voltage: VCC [V] | Sub-Clock | Memory Type            | ROM [bytes] | RAM [bytes] | Cache [Kbytes] | DMAC [ch] | Ext. Interrupt [ch] | External Bus | Maximum I/O port [ch] | 10bit AD Converter [ch/unit] | 12bit AD Converter [ch/unit] | DA Converter [bit x ch] | Output Compare [ch] | Free-Run Timer [ch] | Input Capture [ch] | Reload Timer [ch] | PWM Timer [ch] | PWC Timer [ch] | PPG Timer [ch] | Up/Down Counter [ch] | Other timers [ch] | I²C [ch] | UART/SI [ch] | SIO [ch] | LIN/UART/SIO [ch] | CAN [ch] | USB-Host [ch] | USB-Function [ch] | LCD Controller [seg x col]                                 | Three-phase inverter       | Note | Evaluation Device |
