

Welcome to **E-XFL.COM**

What is "Embedded - Microcontrollers"?

"Embedded - Microcontrollers" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

Applications of "<u>Embedded - Microcontrollers</u>"

Details	
Product Status	Active
Core Processor	R8C
Core Size	16-Bit
Speed	20MHz
Connectivity	I ² C, LINbus, SIO, SSU, UART/USART
Peripherals	LCD, POR, PWM, Voltage Detect, WDT
Number of I/O	68
Program Memory Size	48KB (48K x 8)
Program Memory Type	FLASH
EEPROM Size	4K x 8
RAM Size	6K x 8
Voltage - Supply (Vcc/Vdd)	1.8V ~ 5.5V
Data Converters	A/D 16x10b; D/A 2x8b
Oscillator Type	Internal
Operating Temperature	-20°C ~ 85°C (TA)
Mounting Type	Surface Mount
Package / Case	80-LQFP
Supplier Device Package	80-LQFP (12x12)
Purchase URL	https://www.e-xfl.com/product-detail/renesas-electronics-america/r5f2l387cnfp-31

Email: info@E-XFL.COM

Address: Room A, 16/F, Full Win Commercial Centre, 573 Nathan Road, Mongkok, Hong Kong

1.1.2 Differences between Groups

Table 1.1 lists the Differences between Groups, Table 1.2 lists the Programmable I/O Ports Provided for Each Group, and Table 1.3 lists the LCD Display Function Pins Provided for Each Group. Figures 1.9 to 1.13 show the Pin Assignment for Each Group, and Tables 1.7 to 1.10 list Product Information.

The explanations in the chapters which follow apply to the R8C/L3AC Group only. Note the differences shown below.

Table 1.1 Differences between Groups

Item	Function	R8C/L35C Group	R8C/L36C Group	R8C/L38C Group	R8C/L3AC Group
I/O Ports	Programmable I/O ports	41 pins	52 pins	68 pins	88 pins
	High current drive ports	5 pins	8 pins	8 pins	16 pins
Interrupts	INT interrupt pins	5 pins	8 pins	8 pins	8 pins
	Key input interrupt pins	4 pins	4 pins	8 pins	8 pins
Timer RA	Timer RA output pin	None	1 pin	1 pin	1 pin
Timer RB	Timer RB output pin	None	1 pin	1 pin	1 pin
Timer RD	Timer RD I/O pin	None	None	8 pins	8 pins
Timer RE	Timer RE output pin	None	1 pin	1 pin	1 pin
Timer RG	Timer RG I/O pin	None	None	None	2 pins
	Timer RG output pin	None	None	None	2 pins
A/D Converter	Analog input pin	10 pins	10 pins	16 pins	20 pins
LCD Drive Control Circuit	LCD power supply	3 pins (VL1, VL2, VL4)	4 pins (VL1 to VL4)	4 pins (VL1 to VL4)	4 pins (VL1 to VL4)
	Common output pins	Max. 4 pins	Max. 8 pins	Max. 8 pins	Max. 8 pins
	Segment output pins	Max. 24 pins	Max. 32 pins	Max. 48 pins	Max. 56 pins
Packages		52-pin LQFP	64-pin LQFP	80-pin LQFP	100-pin LQFP/ 100-pin QFP

Note:

I/O ports are shared with I/O functions, such as interrupts or timers.
 Refer to Tables 1.11 to 1.13, Pin Name Information by Pin Number, for details.

Notes:

- 1. The symbol "√" indicates a programmable I/O port.
- 2. The symbol "-" indicates the settings should be made as follows:
 - Set 1 to the corresponding bits in the PDi (i = 1 to 3, 5 to 7, and 10 to 13) register.
 - Set 0 to the corresponding bits in the Pi (i = 1 to 3, 5 to 7, and 10 to 13) register.
 - Set 0 to the corresponding bits in the P10DRR or P11DRR register.

_				VI	_4							VI	_4							VI	_4							V	L4			

Notes:

- 1. The symbol "-" indicates there is no LCD display function. Set the corresponding bits in registers LSE1 to LSE3, LSE5 to LSE7 to 0 for these pins.
- SEG52 to SEG55 can be used as COM7 to COM4.
 The R8C/L35C Group does not have pins SEG52 to SEG55, so 1/8 duty cannot be selected.
- 3. The R8C/L35C Group does not have the VL3 pin, so 1/4 bias cannot be selected. When the internal voltage multiplier is used, 1/2 bias cannot also be selected.

Note:

1. This applies when four pins are selected for common output.

Specifications (3) Table 1.6

Item	Specification
Flash Memory	 Programming and erasure voltage: VCC = 2.7 to 5.5 V
	Programming and erasure endurance: 10,000 times (data flash)
	1,000 times (program ROM)
	Program security: ROM code protect, ID code check
	On-chip debug function
	On-board flash rewrite function
	Background operation (BGO) function
Operating Frequency/	f(XIN) = 20 MHz (VCC = 2.7 to 5.5 V)
Supply Voltage	f(XIN) = 5 MHz (VCC = 1.8 to 5.5 V)
Current Consumption	Typ. 7 mA (VCC = 5.0 V, f(XIN) = 20 MHz)
	Typ. 3.6 mA (VCC = 3.0 V, f(XIN) = 10 MHz)
	Typ. 3.5 μ A (VCC = 3.0 V, wait mode (f(XCIN) = 32 kHz))
	Typ. 2 μ A (VCC = 3.0 V, stop mode)
	Typ. $0.02 \mu A$ (VCC = 3.0 V , power-off mode)
Operating Ambient Temperature	-20 to 85°C (N version)
	-40 to 85°C (D version) (1)

Note:
 1. Specify the D version if D version functions are to be used.

Notes:

- The pin in parentheses can be assigned by a program.
 The number in brackets indicates the pin number for the 100P6F package.

Table 1.15 Pin Functions for R8C/L3AC Group (2)

Item	Pin Name	I/O Type	Description
I ² C bus	SCL	I/O	Clock I/O pin
	SDA	I/O	Data I/O pin
SSU	SSI	I/O	Data I/O pin
	SCS	I/O	Chip-select signal I/O pin
	SSCK	I/O	Clock I/O pin
	SSO	I/O	Data I/O pin
Reference voltage input	VREF	I	Reference voltage input pin for the A/D converter and the D/A converter
A/D converter	AN0 to AN11	I	A/D converter analog input pins
	ADTRG	I	A/D external trigger input pin
D/A converter	DA0, DA1	0	D/A converter output pins
Comparator B	IVCMP1, IVCMP3	I	Comparator B analog voltage input pins
	IVREF1, IVREF3	I	Comparator B reference voltage input pins
I/O ports	P0_0 to P0_7, P1_0 to P1_7, P2_0 to P2_7, P3_0 to P3_7, P4_0 to P4_7, P5_0, P5_3, P6_0 to P6_7 P7_0 to P7_7, P10_0 to P10_7, P11_0 to P11_7, P12_0 to P12_3, P13_0 to P13_7	I/O	CMOS I/O ports. Each port has an I/O select direction register, allowing each pin in the port to be directed for input or output individually. Any port set to input can be set to use a pull-up resistor or not by a program. Ports P10_0 to P10_7 and P11_0 to P11_7 can be used as LED drive ports.
Segment output	SEG0 to SEG55	0	LCD segment output pins
Common output	COM0 to COM7	0	LCD common output pins
Voltage multiplier capacity connect pins	CL1, CL2	0	Connect pins for the LCD control voltage multiplier
LCD power supply	VL1	I/O	Apply the voltage: $0 \le VL1 \le VL2 \le VL3 \le VL4$.
	VL2 to VL4	I	VL1 can be used as the reference potential input or output pin when setting the voltage multiplier.

I: Input Note: O: Output

I/O: Input and output

1. Contact the oscillator manufacturer for oscillation characteristics.

2.1 Data Registers (R0, R1, R2, and R3)

R0 is a 16-bit register for transfer, arithmetic, and logic operations. The same applies to R1 to R3. R0 can be split into high-order bits (R0H) and low-order bits (R0L) to be used separately as 8-bit data registers. R1H and R1L are analogous to R0H and R0L. R2 can be combined with R0 and used as a 32-bit data register (R2R0). R3R1 is analogous to R2R0.

2.2 Address Registers (A0 and A1)

A0 is a 16-bit register for address register indirect addressing and address register relative addressing. It is also used for transfer, arithmetic, and logic operations. A1 is analogous to A0. A1 can be combined with A0 and as a 32-bit address register (A1A0).

2.3 Frame Base Register (FB)

FB is a 16-bit register for FB relative addressing.

2.4 Interrupt Table Register (INTB)

INTB is a 20-bit register that indicates the starting address of an interrupt vector table.

2.5 Program Counter (PC)

PC is 20 bits wide and indicates the address of the next instruction to be executed.

2.6 User Stack Pointer (USP) and Interrupt Stack Pointer (ISP)

The stack pointers (SP), USP and ISP, are each 16 bits wide. The U flag of FLG is used to switch between USP and ISP.

2.7 Static Base Register (SB)

SB is a 16-bit register for SB relative addressing.

2.8 Flag Register (FLG)

FLG is an 11-bit register indicating the CPU state.

2.8.1 Carry Flag (C)

The C flag retains carry, borrow, or shift-out bits that have been generated by the arithmetic and logic unit.

2.8.2 Debug Flag (D)

The D flag is for debugging only. Set it to 0.

2.8.3 **Zero Flag (Z)**

The Z flag is set to 1 when an arithmetic operation results in 0; otherwise to 0.

2.8.4 Sign Flag (S)

The S flag is set to 1 when an arithmetic operation results in a negative value; otherwise to 0.

2.8.5 Register Bank Select Flag (B)

Register bank 0 is selected when the B flag is 0. Register bank 1 is selected when this flag is set to 1.

2.8.6 Overflow Flag (O)

The O flag is set to 1 when an operation results in an overflow; otherwise to 0.

SFR Information (4) (1) Table 4.4

Notes:

- Vcc = 2.7 V to 4.0 V, single chip mode, output pins are open, and other pins are Vss.
- 2. XIN is set to square wave input.
- 4. VLCD = Vcc, external division resistors are used for VL4 to VL1, 1/3 bias, 1/4 duty, f(FR) = 64 Hz, SEG0 to SEG55 are selected, and segment
- and common output pins are open. The standard value does not include the current that flows through external division resistors. The internal voltage multiplier is used, bits LVLS3 to LVLS0 in the LCR1 register = 1011b, 1/3 bias, 1/4 duty, f(FR) = 64 Hz, SEG0 to SEG55 are selected, and segment and common output pins are open.

Table 5.21 DC Characteristics (5) [1.8 V \leq Vcc < 2.7 V] (Topr = -20 to 85°C (N version) / -40 to 85°C (D version), unless otherwise specified.)

Symbol	Do	Parameter Condition	Condition	Standard			Unit

Notice

- 1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
- 2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or
- 3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
- 4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the
- 5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
- 6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
- 7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc
 - Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools personal electronic equipment; and industrial robots.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
 - Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical "Specific": implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
- 8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
- 9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult please evaluate the safety of the final products or system manufactured by you.
- 10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
- 11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics
- 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.
- (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries
- (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics
