Understanding [Embedded - Microcontroller, Microprocessor, FPGA Modules](#)

Embedded - Microcontroller, Microprocessor, and FPGA Modules are fundamental components in modern electronic systems, offering a wide range of functionalities and capabilities. Microcontrollers are compact integrated circuits designed to execute specific control tasks within an embedded system. They typically include a processor, memory, and input/output peripherals on a single chip. Microprocessors, on the other hand, are more powerful processing units used in complex computing tasks, often requiring external memory and peripherals. FPGAs (Field Programmable Gate Arrays) are highly flexible devices that can be configured by the user to perform specific logic functions, making them invaluable in applications requiring customization and adaptability.

Applications of [Embedded - Microcontroller,](#)

Details

Product Status	Active
Module/Board Type	MCU Core
Core Processor	eZ80F92
Co-Processor	-
Speed	20MHz
Flash Size	128KB
RAM Size	8KB (Internal), 512KB (External)
Connector Type	Header 2x25
Size / Dimension	2.5" x 2.5" (64mm x 64mm)
Operating Temperature	0°C ~ 70°C
Purchase URL	https://www.e-xfl.com/product-detail/zilog/ez80f920020modg

General Description

The eZ80F92 Flash Module is a compact, high-performance Flash memory module specially designed for rapid development and deployment of embedded systems requiring control and Internet/Intranet connectivity.

This low-cost, expandable module is powered by ZiLOG's latest power-efficient, optimized pipeline architecture eZ80F92 microcontroller¹. This device is part of ZiLOG's new eZ80Acclaim! product line, which offers MCUs featuring integrated IrDA capabilities and rich on-chip peripherals.

Combined with a 10Mbps 802.3 Ethernet controller, memories, and ZiLOG's industry-leading IrDA transceiver, this module is ideal for wireless IrDA connectivity, industrial control, communication, security, automation, and embedded networking applications.

For rapid development, this module can interface to the eZ80[®] Development Platform, which provides a

1. ZiLOG also offers an eZ80[®] Development Module based on the eZ80F93 MCU, which is intrinsically the same device, yet offering a smaller memory size.

complete user debug environment with power, breadboard area, and serial connectors such as RS-232 and JTAG. For deployment, this compact module interfaces to a user system via its system interface connectors. An RJ-45 Ethernet connector is provided on the module.

System designers with aggressive time-to-market requirements can take comfort in the fact that this tested module, together with available ZiLOG TCP/IP Internet connectivity software and OS, will facilitate quick product launch and low ownership cost.

Features

eZ80F92 Flash Module

- 50MHz eZ80F92 microcontroller
- 1MB, 70ns Flash memory, hardware Write-Protect pin available to user
- 512KB, 35ns high-speed SRAM
- 10BaseT 802.3 Ethernet controller with integrated PHY and 8KB SRAM for Tx/Rx FIFOs
- IrDA SIR transceiver (115Kbps) with power-down control
- 2x 50-pin system expansion interface with full MPU bus/control signals as well as power, peripherals, and user I/Os
- One RJ-45 Ethernet connector
- One LED indicating network link status
- ZiLOG's Internet connectivity software supports over-the-network firmware updates or network configuration
- Module size (including connectors):
2.5" L x 2.5" W x 0.6" H
(63.5mm x 63.5mm x 15.2mm)
- Standard operating temperature: 0°C to +70°C
- Power supply: 3.3V @ 125mA

eZ80F92/eZ80F93 Microcontrollers

- eZ80F92: 128KB Flash, 8KB SRAM
- eZ80F93: 64KB Flash, 4KB SRAM
- Power management features including SLEEP/HALT modes and peripheral power-down controls
- 2 UARTs supporting the 9-bit dot-format, 1x SPI, and 1x I²C, each with independent baud rate generators
- IrDA compatible Infrared Encoder/Decoder
- New DMA-like eZ80[®] instructions
- Glueless external memory interface with 4 Chip Selects, independent WAIT state generators, and external $\overline{\text{WAIT}}$ input pin; supports Z80[™], Intel[™], and Motorola[™] bus-compatible peripherals.
- Interrupt controller supports internal and external maskable interrupts as well as a nonmaskable interrupt input
- Real-time clock with on-chip 32KHz oscillator, selectable 50/60 Hz input, and separate V_{DD} pin for battery backup
- Six 16-bit Counter/Timers with prescalers and direct input/output drive capability
- Watch-Dog Timer
- 24 General-Purpose I/O pins
- Power-On Reset and Voltage Brown-Out
- JTAG Debug Interface, also supports ZiLOG Debug Interface (ZDI)
- 100-pin LQFP package
- 3.0–3.6V supply voltage with 5V tolerant inputs

TCP/IP Software

ZiLOG's royalty-free TCP/IP Internet software suite is an integrated, preemptive multitasking OS and TCP/IP protocol stack that meets all of the relevant RFCs. It is optimized for embedded systems and is implemented as an extension to the ZiLOG

C-Compiler's runtime library. Supported protocols and network features are:

- TCP, UDP, IP, ARP, RARP, ICMP, IGMP, PPP
- FTP, SMTP, HTTP, TELNET, DNS
- TFTP, SNMP, DHCP/BOOTP, TIMEP
- In-system configuration or updates of network parameters, web pages, and module firmware

A set of well-documented OS and network service APIs allow system developers to quickly take advantage of the ZiLOG TCP/IP software suite while remaining focused on the main application. Final binary output from the compiler/linker is the complete user application with networking capabilities across the Internet or any Intranet.

eZ80F92 Development Kit

The eZ80F92 Flash Module is available as a stand-alone development tool module. To help expedite customer evaluation and product development, the low-cost eZ80F92 Development Kit includes the following:

- eZ80F92 Flash Module
- eZ80[®] Development Platform with breadboard area and system expansion headers
- Low-cost ZPAK JTAG/ZDI debugger/emulator
- Two power supply adapters
- Serial RS232 and JTAG/ZDI cables
- One CAT5 cross-over Ethernet cable
- CDROM:
 - C-Compiler and ZiLOG Developer Studio (ZDS) IDE including assembler, linker, debugger, and simulator
- eZ80Acclaim! Software and Documentation on CD-ROM

The Metro IPWorks[™] TCP/IP software stack is available via download from zilog.com.
