What is "Embedded - Microcontrollers"?

"Embedded - Microcontrollers" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

Restriction For High Speed modes

- DSPI2, DSPI3, SPI1 and SPI2 will support 40MHz Master mode SCK
- DSPI2, DSPI3, SPI1 and SPI2 will support 25MHz Slave SCK frequency
- Only one {SIN,SOUT and SCK} group per DSPI/SPI will support high frequency mode
- For Master mode MTFE will be 1 for high speed mode
- For high speed slaves, their master have to be in MTFE=1 mode or should be able to support 15ns tSUO delay

NOTE

For numbers shown in the following figures, see Table 35

1. MLBCLK low/high time includes the pluse width variation.
2. The MediaLB driver can release the MLBDAT/MLBSIG line as soon as MLBCLK is low; however, the logic state of the final driven bit on the line must remain on the bus for tmdzh. Therefore, coupling must be minimized while meeting the maximum load capacitance listed.

Ground = 0.0 V; Load Capacitance = 40 pF, input transition= 1 ns; MediaLB speed = 1024 Fs; Fs = 48 kHz; all timing parameters specified from the valid voltage threshold as listed below; unless otherwise noted.

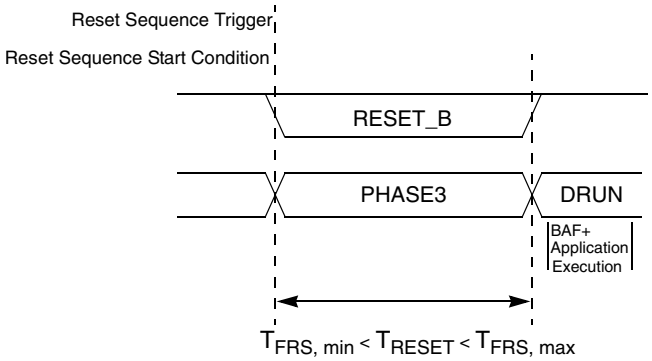

Figure 39. Functional reset sequence short

The reset sequences shown in Figure 38 and Figure 39 are triggered by functional reset events. RESET_B is driven low during these two reset sequences only if the corresponding functional reset source (which triggered the reset sequence) was enabled to drive RESET_B low for the duration of the internal reset sequence. See the RGM_FBRE register in the device reference manual for more information.
