

Welcome to [E-XFL.COM](https://www.e-xfl.com)

### What is "[Embedded - Microcontrollers](#)"?

"[Embedded - Microcontrollers](#)" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

### Applications of "[Embedded - Microcontrollers](#)"

#### Details

Product Status	Active
Core Processor	R8C
Core Size	16-Bit
Speed	20MHz
Connectivity	I <sup>2</sup> C, LINbus, SIO, SSU, UART/USART
Peripherals	POR, PWM, Voltage Detect, WDT
Number of I/O	15
Program Memory Size	8KB (8K x 8)
Program Memory Type	FLASH
EEPROM Size	-
RAM Size	1K x 8
Voltage - Supply (Vcc/Vdd)	1.8V ~ 5.5V
Data Converters	A/D 4x10b
Oscillator Type	Internal
Operating Temperature	-40°C ~ 85°C (TA)
Mounting Type	Surface Mount
Package / Case	20-LSSOP (0.173", 4.40mm Width)
Supplier Device Package	20-LSSOP
Purchase URL	<a href="https://www.e-xfl.com/product-detail/renesas-electronics-america/r5f21322ddsp-w4">https://www.e-xfl.com/product-detail/renesas-electronics-america/r5f21322ddsp-w4</a>

## 1. Overview

### 1.1 Features

The R8C/32D Group of single-chip MCUs incorporates the R8C CPU core, employing sophisticated instructions for a high level of efficiency. With 1 Mbyte of address space, and it is capable of executing instructions at high speed. In addition, the CPU core boasts a multiplier for high-speed operation processing.

Power consumption is low, and the supported operating modes allow additional power control. These MCUs are designed to maximize EMI/EMS performance.

Integration of many peripheral functions, including multifunction timer and serial interface, reduces the number of system components.

#### 1.1.1 Applications

Electronic household appliances, office equipment, audio equipment, consumer equipment, etc.

## 1.1.2 Specifications

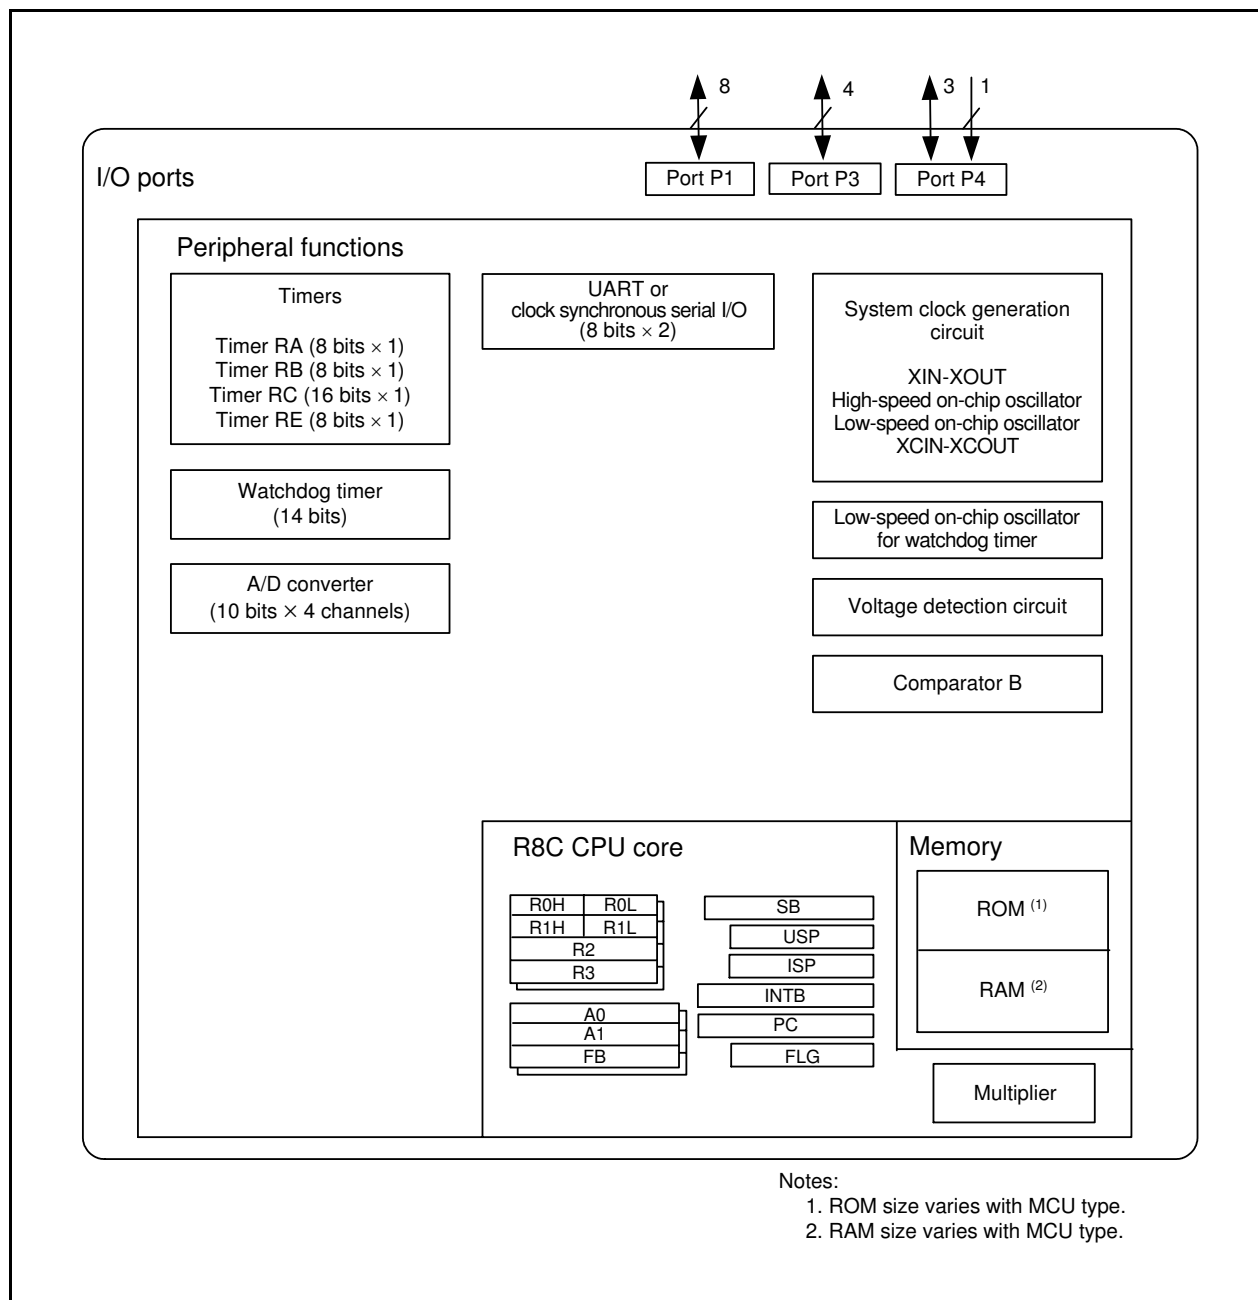

Tables 1.1 and 1.2 outline the Specifications for R8C/32D Group.

**Table 1.1 Specifications for R8C/32D Group (1)**

Item	Function	Specification
CPU	Central processing unit	R8C CPU core <ul style="list-style-type: none"> <li>• Number of fundamental instructions: 89</li> <li>• Minimum instruction execution time:               <ul style="list-style-type: none"> <li>50 ns (<math>f(\text{XIN}) = 20 \text{ MHz}</math>, <math>V_{CC} = 2.7 \text{ to } 5.5 \text{ V}</math>)</li> <li>200 ns (<math>f(\text{XIN}) = 5 \text{ MHz}</math>, <math>V_{CC} = 1.8 \text{ to } 5.5 \text{ V}</math>)</li> </ul> </li> <li>• Multiplier: 16 bits <math>\times</math> 16 bits <math>\rightarrow</math> 32 bits</li> <li>• Multiply-accumulate instruction: 16 bits <math>\times</math> 16 bits + 32 bits <math>\rightarrow</math> 32 bits</li> <li>• Operation mode: Single-chip mode (address space: 1 Mbyte)</li> </ul>
Memory	ROM, RAM	Refer to <b>Table 1.3 Product List for R8C/32D Group</b> .
Power Supply Voltage Detection	Voltage detection circuit	<ul style="list-style-type: none"> <li>• Power-on reset</li> <li>• Voltage detection 3 (detection level of voltage detection 0 and voltage detection 1 selectable)</li> </ul>
I/O Ports	Programmable I/O ports	<ul style="list-style-type: none"> <li>• Input-only: 1 pin</li> <li>• CMOS I/O ports: 15, selectable pull-up resistor</li> <li>• High current drive ports: 15</li> </ul>
Clock	Clock generation circuits	4 circuits: XIN clock oscillation circuit, XCIN clock oscillation circuit (32 kHz), High-speed on-chip oscillator (with frequency adjustment function), Low-speed on-chip oscillator, <ul style="list-style-type: none"> <li>• Oscillation stop detection: XIN clock oscillation stop detection function</li> <li>• Frequency divider circuit: Dividing selectable 1, 2, 4, 8, and 16</li> <li>• Low power consumption modes:               <ul style="list-style-type: none"> <li>Standard operating mode (high-speed clock, low-speed clock, high-speed on-chip oscillator, low-speed on-chip oscillator), wait mode, stop mode</li> </ul> </li> </ul>
Interrupts		Real-time clock (timer RE) <ul style="list-style-type: none"> <li>• Number of interrupt vectors: 69</li> <li>• External Interrupt: 7 (<math>\text{INT} \times 3</math>, Key input <math>\times 4</math>)</li> <li>• Priority levels: 7 levels</li> </ul>
Watchdog Timer		<ul style="list-style-type: none"> <li>• 14 bits <math>\times</math> 1 (with prescaler)</li> <li>• Reset start selectable</li> <li>• Low-speed on-chip oscillator for watchdog timer selectable</li> </ul>
Timer	Timer RA	8 bits $\times$ 1 (with 8-bit prescaler) Timer mode (period timer), pulse output mode (output level inverted every period), event counter mode, pulse width measurement mode, pulse period measurement mode
	Timer RB	8 bits $\times$ 1 (with 8-bit prescaler) Timer mode (period timer), programmable waveform generation mode (PWM output), programmable one-shot generation mode, programmable wait one-shot generation mode
	Timer RC	16 bits $\times$ 1 (with 4 capture/compare registers) Timer mode (input capture function, output compare function), PWM mode (output 3 pins), PWM2 mode (PWM output pin)
	Timer RE	8 bits $\times$ 1 Real-time clock mode (count seconds, minutes, hours, days of week)
Serial Interface	UART0	Clock synchronous serial I/O/UART
	UART2	Clock synchronous serial I/O/UART, I <sup>2</sup> C mode (I <sup>2</sup> C-bus), multiprocessor communication function
A/D Converter		10-bit resolution $\times$ 4 channels, includes sample and hold function, with sweep mode
Comparator B		2 circuits

### 1.3 Block Diagram

Figure 1.2 shows a Block Diagram.

**Figure 1.2 Block Diagram**

## 1.5 Pin Functions

Table 1.5 lists Pin Functions.

**Table 1.5 Pin Functions**

Item	Pin Name	I/O Type	Description
Power supply input	VCC, VSS	–	Apply 1.8 V to 5.5 V to the VCC pin. Apply 0 V to the VSS pin.
Analog power supply input	AVCC, AVSS	–	Power supply for the A/D converter. Connect a capacitor between AVCC and AVSS.
Reset input	$\overline{\text{RESET}}$	I	Input “L” on this pin resets the MCU.
MODE	MODE	I	Connect this pin to VCC via a resistor.
XIN clock input	XIN	I	These pins are provided for XIN clock generation circuit I/O. Connect a ceramic resonator or a crystal oscillator between the XIN and XOUT pins <sup>(1)</sup> . To use an external clock, input it to the XOUT pin and leave the XIN pin open.
XIN clock output	XOUT	I/O	
XCIN clock input	XCIN	I	These pins are provided for XCIN clock generation circuit I/O. Connect a crystal oscillator between the XCIN and XCOU pins <sup>(1)</sup> . To use an external clock, input it to the XCIN pin and leave the XCOU pin open.
XCIN clock output	XCOU	O	
$\overline{\text{INT}}$ interrupt input	$\overline{\text{INT0}}$ , $\overline{\text{INT1}}$ , $\overline{\text{INT3}}$	I	$\overline{\text{INT}}$ interrupt input pins. INT0 is timer RB, and RC input pin.
Key input interrupt	$\overline{\text{KI0}}$ to $\overline{\text{KI3}}$	I	Key input interrupt input pins
Timer RA	TRAIO	I/O	Timer RA I/O pin
	TRA0	O	Timer RA output pin
Timer RB	TRBO	O	Timer RB output pin
Timer RC	TRCLK	I	External clock input pin
	TRCTR	I	External trigger input pin
	TRCIOA, TRCIOB, TRCIOC, TRCIOD	I/O	Timer RC I/O pins
Serial interface	CLK0, CLK2	I/O	Transfer clock I/O pins
	RXD0, RXD2	I	Serial data input pins
	TXD0, TXD2	O	Serial data output pins
	$\overline{\text{CTS2}}$	I	Transmission control input pin
	$\overline{\text{RTS2}}$	O	Reception control output pin
	SCL2	I/O	I <sup>2</sup> C mode clock I/O pin
	SDA2	I/O	I <sup>2</sup> C mode data I/O pin
Reference voltage input	VREF	I	Reference voltage input pin to A/D converter
A/D converter	AN8 to AN11	I	Analog input pins to A/D converter
	$\overline{\text{ADTRG}}$	I	A/D external trigger input pin
Comparator B	IVCMP1, IVCMP3	I	Comparator B analog voltage input pins
	IVREF1, IVREF3	I	Comparator B reference voltage input pins
I/O port	P1_0 to P1_7, P3_3 to P3_5, P3_7, P4_5 to P4_7	I/O	CMOS I/O ports. Each port has an I/O select direction register, allowing each pin in the port to be directed for input or output individually. Any port set to input can be set to use a pull-up resistor or not by a program. All ports can be used as LED drive ports.
Input port	P4_2	I	Input-only port

I: Input      O: Output      I/O: Input and output

Note:

1. Refer to the oscillator manufacturer for oscillation characteristics.

## 2. Central Processing Unit (CPU)

Figure 2.1 shows the CPU Registers. The CPU contains 13 registers. R0, R1, R2, R3, A0, A1, and FB configure a register bank. There are two sets of register bank.

Figure 2.1 CPU Registers

### **2.8.7 Interrupt Enable Flag (I)**

The I flag enables maskable interrupts.

Interrupts are disabled when the I flag is set to 0, and are enabled when the I flag is set to 1. The I flag is set to 0 when an interrupt request is acknowledged.

### **2.8.8 Stack Pointer Select Flag (U)**

ISP is selected when the U flag is set to 0; USP is selected when the U flag is set to 1.

The U flag is set to 0 when a hardware interrupt request is acknowledged or the INT instruction of software interrupt numbers 0 to 31 is executed.

### **2.8.9 Processor Interrupt Priority Level (IPL)**

IPL is 3 bits wide and assigns processor interrupt priority levels from level 0 to level 7.

If a requested interrupt has higher priority than IPL, the interrupt is enabled.

### **2.8.10 Reserved Bit**

If necessary, set to 0. When read, the content is undefined.

## 4. Special Function Registers (SFRs)

An SFR (special function register) is a control register for a peripheral function. Tables 4.1 to 4.8 list the special function registers and Table 4.9 lists the ID Code Areas and Option Function Select Area.

**Table 4.1 SFR Information (1) (1)**

Address	Register	Symbol	After Reset

FFF3h	ID5		(Note 2)
FFF7h	ID6		(Note 2)
FFFBh	ID7		(Note 2)
FFFFh	Option Function Select Register	OFS	(Note 1)

## Notes:

1. The option function select area is allocated in the flash memory, not in the SFRs. Set appropriate values as ROM data by a program. Do not write additions to the option function select area. If the block including the option function select area is erased, the option function select area is set to FFh.  
When blank products are shipped, the option function select area is set to FFh. It is set to the written value after written by the user.  
When factory-programming products are shipped, the value of the option function select area is the value programmed by the user.
2. The ID code areas are allocated in the flash memory, not in the SFRs. Set appropriate values as ROM data by a program. Do not write additions to the ID code areas. If the block including the ID code areas is erased, the ID code areas are set to FFh.  
When blank products are shipped, the ID code areas are set to FFh. They are set to the written value after written by the user.  
When factory-programming products are shipped, the value of the ID code areas is the value programmed by the user.

**Figure 5.1** Ports P1, P3, P4 Timing Measurement Circuit

**Table 5.8 Voltage Detection 2 Circuit Electrical Characteristics**

Symbol	Parameter	Condition	Standard			Unit
			Min.	Typ.	Max.	
Vdet2	Voltage detection level Vdet2_0	At the falling of Vcc	3.70	4.00	4.30	V
—	Hysteresis width at the rising of Vcc in voltage detection 2 circuit		—	0.10	—	V
—	Voltage detection 2 circuit response time <sup>(2)</sup>	At the falling of Vcc from 5 V to (Vdet2_0 – 0.1) V	—	20	150	μs
—	Voltage detection circuit self power consumption	VCA27 = 1, Vcc = 5.0 V	—	1.7	—	μA
td(E-A)	Waiting time until voltage detection circuit operation starts <sup>(3)</sup>		—	—	100	μs

Notes:

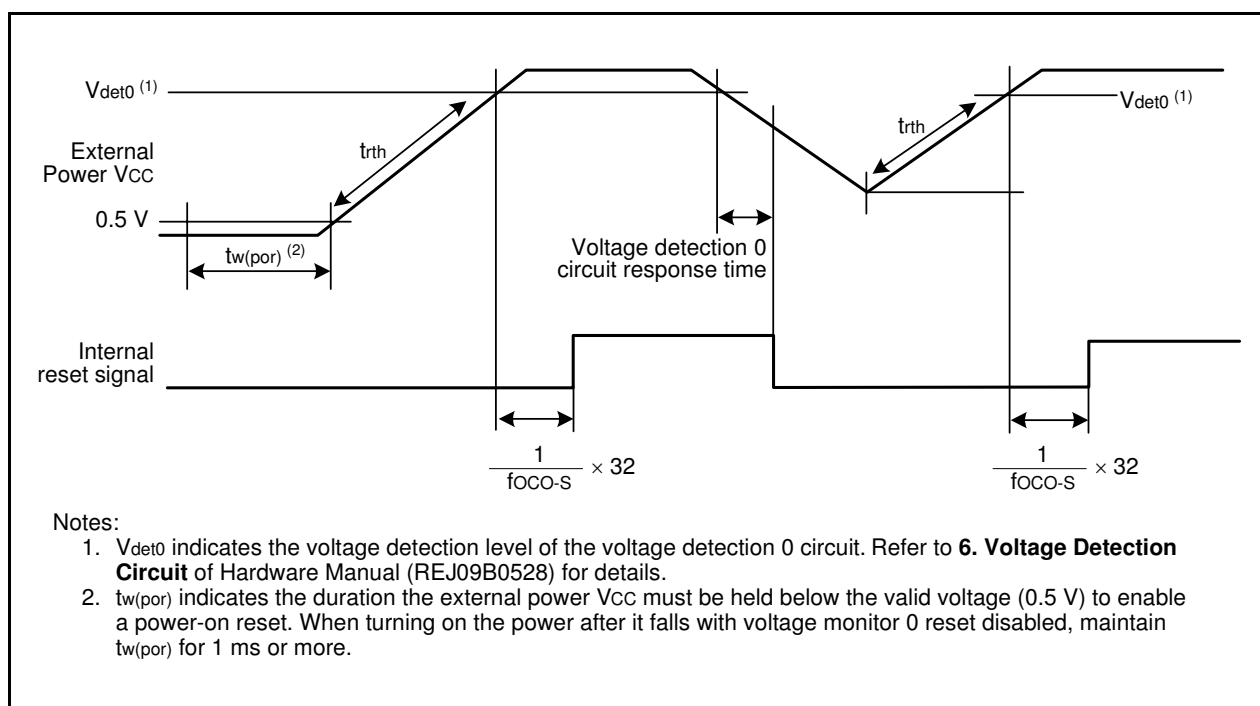

1. The measurement condition is Vcc = 1.8 V to 5.5 V and T<sub>opr</sub> = –20 to 85°C (N version) / –40 to 85°C (D version).
2. Time until the voltage monitor 2 interrupt request is generated after the voltage passes Vdet2.
3. Necessary time until the voltage detection circuit operates after setting to 1 again after setting the VCA27 bit in the VCA2 register to 0.

**Table 5.9 Power-on Reset Circuit (2)**

Symbol	Parameter	Condition	Standard			Unit
			Min.	Typ.	Max.	
trth	External power Vcc rise gradient	<sup>(1)</sup>	0	—	50000	mV/msec

Notes:

1. The measurement condition is T<sub>opr</sub> = –20 to 85°C (N version) / –40 to 85°C (D version), unless otherwise specified.
2. To use the power-on reset function, enable voltage monitor 0 reset by setting the LVDAS bit in the OFS register to 0.

**Figure 5.3 Power-on Reset Circuit Electrical Characteristics**

**Table 5.14 Electrical Characteristics (2) [ $3.3\text{ V} \leq V_{CC} \leq 5.5\text{ V}$ ]**

Notes:

1. This document is provided for reference purposes only so that Renesas customers may select the appropriate Renesas products for their use. Renesas neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of Renesas or any third party with respect to the information in this document.
2. Renesas shall have no liability for damages or infringement of any intellectual property or other rights arising out of the use of any information in this document, including, but not limited to, product data, diagrams, charts, programs, algorithms, and application circuit examples.
3. You should not use the products or the technology described in this document for the purpose of military applications such as the development of weapons of mass destruction or for the purpose of any other military use. When exporting the products or technology described herein, you should follow the applicable export control laws and regulations, and procedures required by such laws and regulations.
4. All information included in this document such as product data, diagrams, charts, programs, algorithms, and application circuit examples, is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas products listed in this document, please confirm the latest product information with a Renesas sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas such as that disclosed through our website. (<http://www.renesas.com>)
5. Renesas has used reasonable care in compiling the information included in this document, but Renesas assumes no liability whatsoever for any damages incurred as a result of errors or omissions in the information included in this document.
6. When using or otherwise relying on the information in this document, you should evaluate the information in light of the total system before deciding about the applicability of such information to the intended application. Renesas makes no representations, warranties or guarantees regarding the suitability of its products for any particular application and specifically disclaims any liability arising out of the application and use of the information in this document or Renesas products.
7. With the exception of products specified by Renesas as suitable for automobile applications, Renesas products are not designed, manufactured or tested for applications or otherwise in systems the failure or malfunction of which may cause a direct threat to human life or create a risk of human injury or which require especially high quality and reliability such as safety systems, or equipment or systems for transportation and traffic, healthcare, combustion control, aerospace and aeronautics, nuclear power, or undersea communication transmission. If you are considering the use of our products for such purposes, please contact a Renesas sales office beforehand. Renesas shall have no liability for damages arising out of the uses set forth above.
8. Notwithstanding the preceding paragraph, you should not use Renesas products for the purposes listed below:
  - (1) artificial life support devices or systems
  - (2) surgical implantations
  - (3) healthcare intervention (e.g., excision, administration of medication, etc.)
  - (4) any other purposes that pose a direct threat to human lifeRenesas shall have no liability for damages arising out of the uses set forth in the above and purchasers who elect to use Renesas products in any of the foregoing applications shall indemnify and hold harmless Renesas Technology Corp., its affiliated companies and their officers, directors, and employees against any and all damages arising out of such applications.
9. You should use the products described herein within the range specified by Renesas, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas shall have no liability for malfunctions or damages arising out of the use of Renesas products beyond such specified ranges.
10. Although Renesas endeavors to improve the quality and reliability of its products, IC products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Please be sure to implement safety measures to guard against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other applicable measures. Among others, since the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
11. In case Renesas products listed in this document are detached from the products to which the Renesas products are attached or affixed, the risk of accident such as swallowing by infants and small children is very high. You should implement safety measures so that Renesas products may not be easily detached from your products. Renesas shall have no liability for damages arising out of such detachment.
12. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written approval from Renesas.
13. Please contact a Renesas sales office if you have any questions regarding the information contained in this document, Renesas semiconductor products, or if you have any other inquiries.
