Welcome to <u>E-XFL.COM</u>

Understanding <u>Embedded - FPGAs (Field</u> <u>Programmable Gate Array)</u>

Embedded - FPGAs, or Field Programmable Gate Arrays, are advanced integrated circuits that offer unparalleled flexibility and performance for digital systems. Unlike traditional fixed-function logic devices, FPGAs can be programmed and reprogrammed to execute a wide array of logical operations, enabling customized functionality tailored to specific applications. This reprogrammability allows developers to iterate designs quickly and implement complex functions without the need for custom hardware.

Applications of Embedded - FPGAs

The versatility of Embedded - FPGAs makes them indispensable in numerous fields. In telecommunications.

Details	
Product Status	Active
Number of LABs/CLBs	56480
Number of Logic Elements/Cells	149500
Total RAM Bits	7880704
Number of I/O	480
Number of Gates	-
Voltage - Supply	1.07V ~ 1.13V
Mounting Type	Surface Mount
Operating Temperature	0°C ~ 85°C (TJ)
Package / Case	896-BGA
Supplier Device Package	896-FBGA (31x31)

Cyclone V Device Overview

The Cyclone[®] V devices are designed to simultaneously accommodate the shrinking power consumption, cost, and time-to-market requirements; and the increasing bandwidth requirements for high-volume and cost-sensitive applications.

Enhanced with integrated transceivers and hard memory controllers, the Cyclone V devices are suitable for applications in the industrial, wireless and wireline, military, and automotive markets.

Key Advantages of Cyclone V Devices

Table 1. Key Advantages of the Cyclone V Device Family

Advantage	Supporting Feature
Lower power consumption	 Built on TSMC's 28 nm low-power (28LP) process technology and includes an abundance of hard intellectual property (IP) blocks Up to 40% lower power consumption than the previous generation device
Improved logic integration and differentiation capabilities	 8-input adaptive logic module (ALM) Up to 13.59 megabits (Mb) of embedded memory Variable-precision digital signal processing (DSP) blocks
Increased bandwidth capacity	3.125 gigabits per second (Gbps) and 6.144 Gbps transceiversHard memory controllers
Hard processor system (HPS) with integrated Arm* Cortex*-A9 MPCore* processor	 Tight integration of a dual-core Arm Cortex-A9 MPCore processor, hard IP, and an FPGA in a single Cyclone V system-on-a-chip (SoC) Supports over 128 Gbps peak bandwidth with integrated data coherency between the processor and the FPGA fabric
Lowest system cost	 Requires only two core voltages to operate Available in low-cost wirebond packaging Includes innovative features such as Configuration via Protocol (CvP) and partial reconfiguration

Summary of Cyclone V Features

Table 2. Summary of Features for Cyclone V Devices

Feature		Description						
Technology	TSMC's 28-nm low-p1.1 V core voltage	······································						
Packaging	 Wirebond low-halogen packages Multiple device densities with compatible package footprints for seamless migration between different device densities RoHS-compliant and leaded⁽¹⁾options 							
High-performance FPGA fabric	Enhanced 8-input ALM w	vith four registers						
Internal memory blocks		b) memory blocks with soft error correction code (ECC) block (MLAB)—640-bit distributed LUTRAM where you can use up to 25% memory						
Embedded Hard IP blocks	Variable-precision DSP	 Native support for up to three signal processing precision levels (three 9 x 9, two 18 x 18, or one 27 x 27 multiplier) in the same variable-precision DSP block 64-bit accumulator and cascade Embedded internal coefficient memory Preadder/subtractor for improved efficiency 						
	Memory controller DDR3, DDR2, and LPDDR2 with 16 and 32 bit ECC support							
	Embedded transceiver I/O	PCI Express* (PCIe*) Gen2 and Gen1 (x1, x2, or x4) hard IP with multifunction support, endpoint, and root port						
Clock networks	, , , ,	l clock network d peripheral clock networks are not used can be powered down to reduce dynamic power						
Phase-locked loops (PLLs)	 Precision clock synth Integer mode and fra	esis, clock delay compensation, and zero delay buffering (ZDB) actional mode						
FPGA General-purpose I/Os (GPIOs)	400 MHz/800 Mbps eOn-chip termination	cond (Mbps) LVDS receiver and 840 Mbps LVDS transmitter external memory interface (OCT) p to 16 mA drive strength						
Low-power high-speed serial interface	 614 Mbps to 6.144 Gbps integrated transceiver speed Transmit pre-emphasis and receiver equalization Dynamic partial reconfiguration of individual channels 							
HPS (Cyclone V SE, SX, and ST devices only)	 Single or dual-core Arm Cortex-A9 MPCore processor-up to 925 MHz maximum frequency wit support for symmetric and asymmetric multiprocessing Interface peripherals—10/100/1000 Ethernet media access control (EMAC), USB 2.0 On-The-GO (OTG) controller, quad serial peripheral interface (QSPI) flash controller, NAND flash controller, Secure Digital/MultiMediaCard (SD/MMC) controller, UART, controller area network (CAN), serial peripheral interface (SPI), I²C interface, and up to 85 HPS GPIO interfaces 							
		-general-purpose timers, watchdog timers, direct memory access (DMA) iguration manager, and clock and reset managers						
		continued						

⁽¹⁾ Contact Intel for availability.

Feature	Description
	 HPS-FPGA bridges—include the FPGA-to-HPS, HPS-to-FPGA, and lightweight HPS-to-FPGA bridges that allow the FPGA fabric to issue transactions to slaves in the HPS, and vice versa FPGA-to-HPS SDRAM controller subsystem—provides a configurable interface to the multiport front end (MPFE) of the HPS SDRAM controller Arm CoreSight[™] JTAG debug access port, trace port, and on-chip trace storage
Configuration	 Tamper protection—comprehensive design protection to protect your valuable IP investments Enhanced advanced encryption standard (AES) design security features CvP Dynamic reconfiguration of the FPGA Active serial (AS) x1 and x4, passive serial (PS), JTAG, and fast passive parallel (FPP) x8 and x16 configuration options Internal scrubbing ⁽²⁾ Partial reconfiguration ⁽³⁾

Cyclone V Device Variants and Packages

Table 3. Device Variants for the Cyclone V Device Family

Variant	Description
Cyclone V E	Optimized for the lowest system cost and power requirement for a wide spectrum of general logic and DSP applications
Cyclone V GX	Optimized for the lowest cost and power requirement for 614 Mbps to 3.125 Gbps transceiver applications
Cyclone V GT	The FPGA industry's lowest cost and lowest power requirement for 6.144 Gbps transceiver applications
Cyclone V SE	SoC with integrated Arm-based HPS
Cyclone V SX	SoC with integrated Arm-based HPS and 3.125 Gbps transceivers
Cyclone V ST	SoC with integrated Arm-based HPS and 6.144 Gbps transceivers

Cyclone V E

⁽⁹⁾ 1 PCIe Hard IP Block in U672 package.

I/O Vertical Migration for Cyclone V Devices

Figure 7. Vertical Migration Capability Across Cyclone V Device Packages and Densities

The arrows indicate the vertical migration paths. The devices included in each vertical migration path are shaded. You can also migrate your design across device densities in the same package option if the devices have the same dedicated pins, configuration pins, and power pins.

You can achieve the vertical migration shaded in red if you use only up to 175 GPIOs for the M383 package, and 138 GPIOs for the U672 package. These migration paths are not shown in the Intel Quartus Prime software Pin Migration View.

Note: To verify the pin migration compatibility, use the Pin Migration View window in the Intel Quartus Prime software Pin Planner.

Adaptive Logic Module

Cyclone V devices use a 28 nm ALM as the basic building block of the logic fabric.

The ALM, as shown in following figure, uses an 8-input fracturable look-up table (LUT) with four dedicated registers to help improve timing closure in register-rich designs and achieve an even higher design packing capability than previous generations.

Figure 8. ALM for Cyclone V Devices

You can configure up to 25% of the ALMs in the Cyclone V devices as distributed memory using MLABs.

Related Information

Embedded Memory Capacity in Cyclone V Devices on page 21 Lists the embedded memory capacity for each device.

Variable-Precision DSP Block

Cyclone V devices feature a variable-precision DSP block that supports these features:

- Configurable to support signal processing precisions ranging from 9 x 9, 18 x 18 and 27 x 27 bits natively
- A 64-bit accumulator
- A hard preadder that is available in both 18- and 27-bit modes
- Cascaded output adders for efficient systolic finite impulse response (FIR) filters
- Internal coefficient register banks, 8 deep, for each multiplier in 18- or 27-bit mode
- Fully independent multiplier operation
- A second accumulator feedback register to accommodate complex multiplyaccumulate functions
- Fully independent Efficient support for single-precision floating point arithmetic
- The inferability of all modes by the Intel Quartus Prime design software

Table 16. Variable-Precision DSP Block Configurations for Cyclone V Devices

Usage Example	Multiplier Size (Bit)	DSP Block Resource
Low precision fixed point for video applications	Three 9 x 9	1
Medium precision fixed point in FIR filters	Two 18 x 18	1
FIR filters and general DSP usage	Two 18 x 18 with accumulate	1
High precision fixed- or floating-point implementations	One 27 x 27 with accumulate	1

You can configure each DSP block during compilation as independent three 9 x 9, two 18×18 , or one 27×27 multipliers. With a dedicated 64 bit cascade bus, you can cascade multiple variable-precision DSP blocks to implement even higher precision DSP functions efficiently.

Table 17. Number of Multipliers in Cyclone V Devices

The table lists the variable-precision DSP resources by bit precision for each Cyclone V device.

Variant	Member Code	Variable- precision DSP Block	precision Multiplications Operator				18 x 18 Multiplier
		DSP Block	9 x 9 Multiplier	18 x 18 Multiplier	27 x 27 Multiplier	Adder Mode	Adder Summed with 36 bit Input

Low-Power Serial Transceivers

Cyclone V devices deliver the industry's lowest power 6.144 Gbps transceivers at an estimated 88 mW maximum power consumption per channel. Cyclone V transceivers are designed to be compliant with a wide range of protocols and data rates.

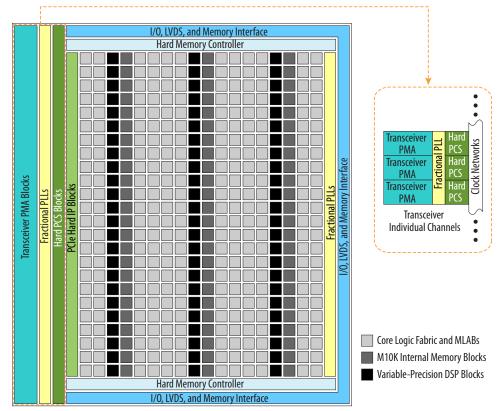

Transceiver Channels

The transceivers are positioned on the left outer edge of the device. The transceiver channels consist of the physical medium attachment (PMA), physical coding sublayer (PCS), and clock networks.

Figure 10. Device Chip Overview for Cyclone V GX and GT Devices

The figure shows a Cyclone V FPGA with transceivers. Different Cyclone V devices may have a different floorplans than the one shown here.

PMA Features

To prevent core and I/O noise from coupling into the transceivers, the PMA block is isolated from the rest of the chip—ensuring optimal signal integrity. For the transceivers, you can use the channel PLL of an unused receiver PMA as an additional transmit PLL.

Table 22. PMA Features of the Transceivers in Cyclone V Devices

Features	Capability
Backplane support	Driving capability up to 6.144 Gbps
PLL-based clock recovery	Superior jitter tolerance
Programmable deserialization and word alignment	Flexible deserialization width and configurable word alignment pattern
Equalization and pre-emphasis	 Up to 14.37 dB of pre-emphasis and up to 4.7 dB of equalization No decision feedback equalizer (DFE)
Ring oscillator transmit PLLs	614 Mbps to 6.144 Gbps
Input reference clock range	20 MHz to 400 MHz
Transceiver dynamic reconfiguration	Allows the reconfiguration of a single channel without affecting the operation of other channels

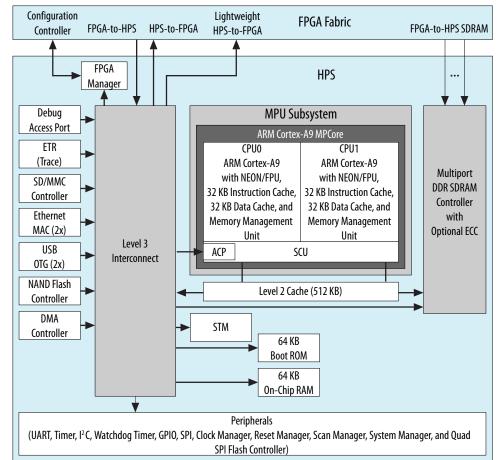

Figure 11. HPS with Dual-Core Arm Cortex-A9 MPCore Processor

System Peripherals and Debug Access Port

Each Ethernet MAC, USB OTG, NAND flash controller, and SD/MMC controller module has an integrated DMA controller. For modules without an integrated DMA controller, an additional DMA controller module provides up to eight channels of high-bandwidth data transfers. Peripherals that communicate off-chip are multiplexed with other peripherals at the HPS pin level. This allows you to choose which peripherals to interface with other devices on your PCB.

The debug access port provides interfaces to industry standard JTAG debug probes and supports Arm CoreSight debug and core traces to facilitate software development.

Power Management

Leveraging the FPGA architectural features, process technology advancements, and transceivers that are designed for power efficiency, the Cyclone V devices consume less power than previous generation Cyclone FPGAs:

- Total device core power consumption—less by up to 40%.
- Transceiver channel power consumption—less by up to 50%.

Additionally, Cyclone V devices contain several hard IP blocks that reduce logic resources and deliver substantial power savings of up to 25% less power than equivalent soft implementations.

Document Revision History for Cyclone V Device Overview

Document Version	Changes
2018.05.07	 Added the low power option ("L" suffix) for Cyclone V SE and Cyclone V SX devices in the Sample Ordering Code and Available Options diagrams. Rebranded as Intel.

Date	Version	Changes
December 2017	2017.12.18	Updated ALM resources for Cyclone V E, Cyclone V SE, Cyclone V SX, and Cyclone V ST devices.
June 2016	2016.06.10	Updated Cyclone V GT speed grade to -7 in Sample Ordering Code and Available Options for Cyclone V GT Devices diagram.
December 2015	2015.12.21	 Added descriptions to package plan tables for Cyclone V GT and ST devices. Changed instances of <i>Quartus II</i> to <i>Quartus Prime</i>.
June 2015	2015.06.12	 Replaced a note to partial reconfiguration feature. Note: The partial reconfiguration feature is available for Cyclone V E, GX, SE, and SX devices with the "SC" suffix in the part number. For device availability and ordering, contact your local Altera sales representatives. Updated logic elements (LE) (K) for the following devices: Cyclone V E A7: Updated from 149.5 to 150 Cyclone V GX C3: Updated from 149.7 to 150 Cyclone V GT D7: Updated from 149.5 to 150 Cyclone V GT D7: Updated from 149.5 to 150 Updated MLAB (Kb) in Maximum Resource Counts for Cyclone V GX Devices table as follows: Cyclone V GX C3: Updated from 291 to 182 Cyclone V GX C4: Updated from 678 to 424 Cyclone V GX C7: Updated from 1,338 to 836 Cyclone V GX C9: Updated from 1,717
	1	continued

•Updated MLAB RAM Bit (KD) in Embedded Memory Capacity and Distribution in Cyclone V GX G3: Updated from 181 to 182 - Cyclone V GX G4: Updated from 25 to 243 • Updated Total RAM Bit (KD) in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: - Cyclone V GX G3: Updated from 1,531 to 1,532 - Cyclone V GX G4: Updated from 2,795 to 2,924March 20152015.03.31• Added Internal Scrubbing Fedure under configuration in Summary of Fedures for Cyclone V Devices table as follows: - Cyclone V GX G4: Updated from 7,975 to 2,824 - Cyclone V GX G4: Updated from 7,975 to 2,824 - Cyclone V GX G4: Updated from 7,975 to 788 - Cyclone V GX G4: Updated from 797 to 678March 20152015.03.31• Added internal scrubbing fedure under configuration in Summary of Fedures for Cyclone V Devices table. - Added optional suffix "SC: Internal scrubbing fedure under configuration in Summary of Fedures for Cyclone V GX G3: Updated from 679 to 678January 20152015.01.23• Updated Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V ST Devices - Operating Temperature: Removed C and A temperature grades - Updated the transceiver specification for Cyclone V ST Devices - Sample Ordering Code and Available Options for Cyclone V ST Devices - Device Variants for the Cyclone V Device Family table - Device Variants for the Cyclone V Device Family table - Device Variants for the Cyclone V ST Devices - Device Variants for the Cyclone V Device Family table - Device Variants for Cyclone V Device Tamily table	Date	Version	Changes
Features for Cyclone V Devices table.• Added optional suffix "SC: Internal scrubbing support" to the following diagrams:- Sample Ordering Code and Available Options for Cyclone V E Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V STDevices figure because Cyclone V ST devices are only available in 1 temperature grade and -7 speed grade Operating Temperature: Removed C and A temperature grades- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver counts for Cyclone V ST Devices- Updated Maximum Resource Counts for Cyclone V ST Devices- Logic elements (LE) (K): Updated from 51 to 57- 18 × 18 multiplier: Updated from 51 to 57- 9 × 9 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 134 bit Input: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 134 bit 17- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier:			 Distribution in Cyclone V Devices table as follows: Cyclone V GX C3: Updated from 181 to 182 Cyclone V GX C4: Updated from 295 to 424 Updated Total RAM Bit (Kb) in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C3: Updated from 1,531 to 1,532 Cyclone V GX C4: Updated from 2,795 to 2,924 Updated MLAB Block count in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C4: Updated from 2,795 to 2,924 Updated MLAB Block count in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C4: Updated from 472 to 678
Devices figure because Cyclone V ST devices are only available in 1 temperature grade and -7 speed grade. 	March 2015	2015.03.31	 Features for Cyclone V Devices table. Added optional suffix "SC: Internal scrubbing support" to the following diagrams: Sample Ordering Code and Available Options for Cyclone V E Devices Sample Ordering Code and Available Options for Cyclone V GX Devices Sample Ordering Code and Available Options for Cyclone V SE Devices
	January 2015	2015.01.23	 Devices figure because Cyclone V ST devices are only available in I temperature grade and -7 speed grade. Operating Temperature: Removed C and A temperature grades FPGA Fabric Speed Grade: Removed -6 and -8 speed grades Updated the transceiver specification for Cyclone V ST from 5 Gbps to 6.144 Gbps: Device Variants for the Cyclone V Device Family table Sample Ordering Code and Available Options for Cyclone V ST Devices figure Maximum Resource Counts for Cyclone V ST Devices Updated Maximum Resource Counts for Cyclone V GX Devices table for Cyclone V GX G3 devices. Logic elements (LE) (K): Updated from 35.7 to 35.5 Variable-precision DSP block: Updated from 51 to 57 18 × 18 multiplier: Updated from 102 to 114 Updated Number of Multipliers in Cyclone V Devices table for Cyclone V GX G3 devices. Variableprecision DSP Block: Updated from 51 to 57 9 × 9 Multiplier: Updated from 153 to 171 18 × 18 Multiplier: Updated from 102 to 114 27 × 27 Multiplier: Updated from 51 to 57 18 × 18 Multiplier Adder Mode: Updated from 51 to 57 18 × 18 Multiplier Adder Summed with 36 bit Input: Updated from 51 to 57 18 × 18 Multiplier Adder Summed with 36 bit Input: Updated from 51 to 57 M10K RAM bit (Kb): Updated from 1,190 to 1,350 MLAB block: Updated from 255 to 291 MLAB RAM bit (Kb): Updated from 159 to 181
	October 2014	2014.10.06	

Cyclone V SE and SX devices. December 2013 2013.12.26 Corrected single or dual-core ARM Cortex-A9 MPCore processor-up t MHz from 800 MHz. Removed "Preliminary" texts from Ordering Code figures, Maximum Resources, Package Phan and I/O Vertical Migration tables. Removed "Preliminary" texts from Ordering Code figures, Maximum Resources, Package Phan and I/O Vertical Migration tables. Added link to Altera Product Selector for each device variant. Updated Embedded Hard IPs for Cyclone V GT devices to indicate Maximum 2 hard PCIe and 2 hard memory controllers. Added leaded package options. Removed the note "The number of PLIs includes general-purpose fractional PLLs and transceiver fractional PLLs" for all PLLs in the Maximum Resource Counts table. Corrected max LVDS counts for transmitter and receiver for Cyclone A3 device from 140 to 120. Corrected variable-precision DSP block, 27 x 27 multiplier, 18 x 18 multiplier adder mode and 18 x 18 multiplier adder summed with 36 input for Cyclone V SE devices from 15 to 84. Corrected 1 VDS transmitter for Cyclone V SE A2 and A4 as well as SX and C4 devices from 31 to 32. Corrected 1VDS transmitter for Cyclone V SE A2 and A4 as well as SX and C4 devices from 31 to 37. Corrected 1VDS receiver for Cyclone V SE A2 and A4 as well as SX of C4 devices from 31 to 37. Corrected transciever speed grade for Cyclone V ST devices ordering from 4 to 5. Updated the DDR3 SDRAM for the maximum frequency's soft contro and the minimum frequency from 300 to 303 for voltage 1.35V. Added links to hare S Sterenal Memory Spec Estimator tool t	Date	Version	Changes
MH2 from 800 MH2. Removed Preliminary" texts from Ordering Code figures, Maximum Resources, Package Plan and I/O Vertical Migraton tables. Removed the note "The number of GPIOs does not include transceive I/Os." for GPIOs in the Maximum Resource Counts table Cyclone V E and SE. Added link to Altera Product Selector for each device variant. Updated Embedded Hard IPs for Cyclone V GT devices to indicate Maximum 2 hard PCIe and 2 hard memory controllers. Added leade package options. Removed the note "The number of PLLs includes general-purpose fractional PLLs and transceiver factional PLLs and transceiver for Cyclone V GT devices to indicate Maximum Resource Counts table. Corrected max LVDS counts for transmitter and receiver for Cyclone A5 device from 84 to 60. Corrected max LVDS counts for transmitter and receiver for Cyclone A5 device from 140 to 120. Corrected Variable-precision DSP block, 27 x 27 multiplier, 18 x 18 multiplier adder mode and 18 x 18 multiplier adder subs and and 18 x 18 multiplier adder subs and 18 x 18 multiplier for Cyclone V SE devices from 116 to 11. Corrected 18 x 18 multiplier for Cyclone V SE 2 and A4 as well as SX and C4 devices from 35 to 37. Corrected 1VDS transmitter for Cyclone V SE 42 and A4 as well as SX and C4 devices from 35 to 37. Corrected 14 TuDS counter to see foronsmance. Corrected 14 to SS SDRAM for the maximum frequency's soft counts and the solution of the setternal memory interface performance. Corrected 14 to SS supported through the soft PCS in the PCS feature Cyclone	July 2014	2014.07.07	Updated the I/O vertical migration figure to clarify the migration capability of Cyclone V SE and SX devices.
 Corrected 18 x 18 multiplier for Cyclone V SE devices from 116 to 14 Corrected 9 x 9 multiplier for Cyclone V SE devices from 174 to 252. Corrected LVDS transmitter for Cyclone V SE A2 and A4 as well as S and C4 devices from 31 to 32. Corrected LVDS receiver for Cyclone V SE A2 and A4 as well as SX C C4 devices from 35 to 37. Corrected transceiver speed grade for Cyclone V ST devices ordering from 4 to 5. Updated the DDR3 SDRAM for the maximum frequency's soft contro and the minimum frequency from 300 to 303 for voltage 1.35V. Added links to Altera's External Memory Spec Estimator tool to the t listing the external memory interface performance. Corrected XAUI is supported through the soft PCS in the PCS feature Cyclone V. Added decompression support for the CvP configuration mode. May 2013 2013.05.06 Added link to the known document issues in the Knowledge Base. Moved all links to the Related Information section of respective topic easy reference. Corrected the title to the PCIe hard IP topic. Cyclone V devices supp only PCIE Gen1 and Gen2. Updated Supporting Feature in Table 1 of Increased bandwidth capaar '6.144 Gbps'. Updated Description in Table 2 of Low-power high-speed serial interface 1.44 Gbps'. Updated LVDS in the M386 package to M383 for Figure 1, Figure 2 and Figure 1.44 Gbps'. Updated LVDS in the Maximum Resource Counts tables to include Transmitter and Receiver values. 	December 2013	2013.12.26	 Corrected single or dual-core ARM Cortex-A9 MPCore processor-up to 925 MHz from 800 MHz. Removed "Preliminary" texts from Ordering Code figures, Maximum Resources, Package Plan and I/O Vertical Migration tables. Removed the note "The number of GPIOs does not include transceiver I/Os. In the Quartus II software, the number of user I/Os includes transceiver I/Os." for GPIOs in the Maximum Resource Counts table for Cyclone V E and SE. Added link to Altera Product Selector for each device variant. Updated Embedded Hard IPs for Cyclone V GT devices to indicate Maximum 2 hard PCIe and 2 hard memory controllers. Added leaded package options. Removed the note "The number of PLLs includes general-purpose fractional PLLs and transceiver fractional PLLs." for all PLLs in the Maximum Resource Counts table. Corrected max LVDS counts for transmitter and receiver for Cyclone V E A9 device from 140 to 120. Corrected variable-precision DSP block, 27 x 27 multiplier, 18 x 18 multiplier adder mode and 18 x 18 multiplier adder summed with 36 bit
May 2013 2013.05.06 Added link to the known document issues in the Knowledge Base. Moved all links to the Related Information section of respective topic easy reference. Corrected the title to the PCIe hard IP topic. Cyclone V devices supp only PCIe Gen1 and Gen2. Updated Supporting Feature in Table 1 of Increased bandwidth capae '6.144 Gbps'. Updated Description in Table 2 of Low-power high-speed serial interf '6.144 Gbps'. Updated Description in Table 3 of Cyclone V GT to '6.144 Gbps'. Updated the M386 package to M383 for Figure 1, Figure 2 and Figure Updated LVDS in the Maximum Resource Counts tables to include Transmitter and Receiver values. 			 Corrected 18 x 18 multiplier for Cyclone V SE devices from 116 to 168. Corrected 9 x 9 multiplier for Cyclone V SE devices from 174 to 252. Corrected LVDS transmitter for Cyclone V SE A2 and A4 as well as SX C2 and C4 devices from 31 to 32. Corrected LVDS receiver for Cyclone V SE A2 and A4 as well as SX C2 and C4 devices from 35 to 37. Corrected transceiver speed grade for Cyclone V ST devices ordering code from 4 to 5. Updated the DDR3 SDRAM for the maximum frequency's soft controller and the minimum frequency from 300 to 303 for voltage 1.35V. Added links to Altera's External Memory Spec Estimator tool to the topics listing the external memory interface performance. Corrected XAUI is supported through the soft PCS in the PCS features for Cyclone V.
 Updated the GPIO count to '129' for the M301 package of the Cyclor GX C5 device. Updated 5 Gbps to '6.144 Gbps' forCyclone V GT device. 	May 2013	2013.05.06	 Added link to the known document issues in the Knowledge Base. Moved all links to the Related Information section of respective topics for easy reference. Corrected the title to the PCIe hard IP topic. Cyclone V devices support only PCIe Gen1 and Gen2. Updated Supporting Feature in Table 1 of Increased bandwidth capacity to '6.144 Gbps'. Updated Description in Table 2 of Low-power high-speed serial interface to '6.144 Gbps'. Updated Description in Table 3 of Cyclone V GT to '6.144 Gbps'. Updated the M386 package to M383 for Figure 1, Figure 2 and Figure 3. Updated Figure 2 and Figure 3 for Transceiver Count by adding 'F : 4'. Updated LVDS in the Maximum Resource Counts tables to include Transmitter and Receiver values. Updated the M301 and M383 packages from the Cyclone V GX C4 device. Updated the GPIO count to '129' for the M301 package of the Cyclone V GX C5 device.

aid A6. Updated Memory (Kb) for Maximum Resource Counts for Cyclone V SE A and A6, SX C4 and C6, ST D6 devices. Updated PGA PLL for Maximum Resource Counts for Cyclone V SE A2, S (2, devices. Removed '36 x 36' from the Variable-Precision DSP Block. Updated HPG PLL for Maximum Resource Counts for Cyclone V SE A4, SC (2, devices. Not and ST devices. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SS, C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. Removed 'Gounter reconfiguration from the PLL Features. Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. Updated the Capability in Table 23 of SGbps and 6 Gbps Basic 1 '5.144 Gbps. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the partial reconfiguration is an advanced feature. Contact Atte for support of the Feature. December 2012 2012.12.28 Updated the QFD counts for the MBGA packages. Updated the option counts for the MBGA packages. Updated the OFID devices. Updated the option counts for the VH44 package of the Cyclone V E A9, C (9, and GT D) devices. Updated the Vertical migration table for Cyclone V T A9, C (9, and GT D) devices. <th>Date</th> <th>Version</th> <th>Changes</th>	Date	Version	Changes
and A6, SX C4 and C6, ST D6 devices.Updated PGA PLL for Maximum Resource Counts for Cyclone V SE A2, SC (2, devices).Removed '26 x 36' from the Variable-Precision DSP Block.Updated Variable-precision DSP Blocks and 18 x 18 Multiplier for Maximum Resource Counts for Cyclone V SX C4 device.Updated Table 17 for Cyclone V SX C4 device.Updated Table 17 for Cyclone V SX C4 device.Updated Enbedded Memory Capacity and Distribution table.Updated Enbedded Memory Capacity and Distribution table for Cyclone V SK C4 device.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps.Updated the Capability in Table 22 of Ring oscillator transmit PLs with 6.144 Gbps.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CRI 4.1 to '6.144 Gbps'.Updated the GPIO counts for the MBGA packages.Updated the GPIO counts for the VBA package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the GPIO counts for the VBA package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the Wertical migration table for vertical migration of the U484 package.Updated the WBGA packages and additional U484 packages for Cyclone V GX and GT.Added ordering code for five-transceiver devices for Cyclone V GX and CFI.Updated the Vertical migration table to add MBGA packages.Adde			and A6.
C2, devices. • Removed '36 x 36' from the Variable-Precision DSP Block. Updated Variable-precision DSP Blocks and 18 x 18 Multiplier for Maximum Resource Counts for Cyclone V SX C4 device. • Updated the HPS I/O counts for Cyclone V SX C4 device. Updated Table 17 for Cyclone V SX C4 device. • Updated Table 17 for Cyclone V SX C4 device. Updated Table 17 for Cyclone V SX C4 device. • Updated Table 17 for Cyclone V SX C4 device. • Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. • Removed 'Ounter reconfiguration' from the PLL Features. • Updated Low-Power Serial Transceivers by replacing 5 Gbps soluth 6.144 Gbps. • Updated Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Capability in Table 23 of CPR 14.1 to '6.144 Gbps'. • Updated the PCS Support in Table 23 of CPR 14.1 to '6.144 Gbps'. • Updated the GPS • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the GPIO counts for the MBGA packages. • Updated the GPIO counts for the U484 package of the Cyclone V E A9, G S, and GT O9 devices. • Updated the GPIO counts for the U484 packages for Cyclone V E A9, G C, and GT O9 devices. • Updated the wrtical migration table for vertical migration of th

Updated the Vertical migration table 42 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V G7 and S Updated the vertical migration table to add MBGA packages. Updated the VHLB support. Updated the VHLB support. Updated the VHLB support. Updated Cyclone V S1 Speed grade information. Added information or HPB secover dol R33 upport. Updated Cyclone V S1 Speed grade inform			Updated FPGA PLL for Maximum Resource Counts for Cyclone V SE A2, SX C2, devices.
Maximum Resource Counts for Cyclone V SE, SX, and ST device.Updated He HPS I/O counts for Cyclone V SE, SX, and ST devices.Updated Table 17 for Cyclone V SX C4 device.Updated Embedded Memory Capacity and Distribution table for CycloneSE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with6.144 Gbps.Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 from 5 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1'6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the OPIO counts for the MBGA packages.Updated the GPIO and transceiver counts for the MBGA packages.Updated the GPIO and transceiver counts for the U484 package of the Cyclone V E A9, CC9, and GT D9 devices.Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added ordering code for five-transceiver devices for Cyclone V GT and SUpdated the vertical migration table to add MBGA packages.Updated the outring code for five-transceiver devices for Cyclone V GT and SUpdated the outring code for five-transceiver devices for Cyclone V GT and SUpdated the outring code for five-transceiver devices for Cyclone V GT and S <td></td> <td></td> <td>• Removed '36 x 36' from the Variable-Precision DSP Block.</td>			• Removed '36 x 36' from the Variable-Precision DSP Block.
• Updated Figure 7 which shows the I/O vertical migration table. • Updated Table 17 for Cyclone V SX C4 device. • Updated Embedded Memory Capacity and Distribution table for Cyclone SE A4 and A6, SX C4 and C6, ST D6 devices. • Removed 'Counter reconfiguration' from the PLL Features. • Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. • Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the OPIO counts for the MBGA packages. • Updated the GPIO and transceiver counts for the MBGA packages. • Updated the Vertical migration table for vertical migration of the U484 packages. • Updated the WIGA packages and additional U484 packages for Cyclone V GX, and GT. • Added orderining code for five-transceiver			
Image: Section of the section of th			• Updated the HPS I/O counts for Cyclone V SE, SX, and ST devices.
Updated Embedded Memory Capacity and Distribution table for Cyclone SE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Removed 'Distributed Memory' symbol.Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps'.Updated the DCS Support in Table 23 for 5 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basis ti '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the QPIO counts for the MBGA packages.Updated the QPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the QPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.November 20122012.11.19Added new MGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI 4 4.9152 Gbps transmit jitter compliance.November 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0			• Updated Figure 7 which shows the I/O vertical migration table.
SE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Updated Low-Power 20isributed Memory' symbol.Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.Updated the PCS Support in Table 23 for 0 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 2 GPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature.December 20122012.12.28Updated the GPIO counts for the MBGA packages.Updated the GPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the WEAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI 4 4.9152 Gbps transmit jitter compliance.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI 4 4.9152 Gbps transmit jitter compliance.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI 4 4.9152 Gbps transmit jitter compliance.Added information on maximum transceiver channel usage restrictions f <br< td=""><td></td><td></td><td>Updated Table 17 for Cyclone V SX C4 device.</td></br<>			Updated Table 17 for Cyclone V SX C4 device.
•Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.•Removed "Distributed Memory' symbol.•Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated the CGS Support in Table 23 form 5 Gbps to '6 Gbps'.•Updated the PCS Support in Table 23 form 5 Gbps to '6 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Updated the PCI and ratical reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28•Updated the GPIO counts for the MBGA packages.•Updated the GPIO counts for the U484 package of the Cyclone V E A9, CC (C9, and GT D9 devices.•Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19•Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.•Updated Cyclone V ST speed grade information.•Added ordering code for five-transceiver devices for Cyclone V GT and S · Updated the vertical migration and information.•Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.•Added order ing code for five-transceiver devices for Cyclone V GT and S · Updated the vertical migration on maximum transceiver controller.•Removed			Updated Embedded Memory Capacity and Distribution table for Cyclone V SE A4 and A6, SX C4 and C6, ST D6 devices.
6.144 Gbps. Removed 'Distributed Memory' symbol. Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. Updated the Capability in Table 23 from 5 Gbps to '6 Gbps'. Updated the PCS Support in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of 2 GPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature. December 2012 2012.12.28 Updated the GPIO and transceiver counts for the MBGA packages. Updated the GPIO and transceiver counts for the U484 package of the Cyclone V E A9, C C, O, and GT D9 devices. Updated the Vertical migration table for vertical migration of the U484 packages. Updated the MLB supported programmable widths at 32 bits depth. November 2012 2012.11.19 Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPR			Removed 'Counter reconfiguration' from the PLL Features.
•Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.•Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature.December 20122012.12.28Updated the GPIO counts for the MBGA packages. 			
Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.Updated the PCS Support in Table 23 of 3 Gbps and 6 Gbps Basic t '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.December 20122012.12.28Updated the pin counts for the MBGA packages.Updated the GPIO and transceiver counts for the MBGA packages.Updated the CPI Counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the CPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Vupdated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added performance information for HPS memory controller.Removed DDR3U support.Updated Cryclone V ST speed grade information.Added information on maximum transceiver channel usage restrictions fo PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Removed 'Distributed Memory' symbol.
6.144 Gbps. • Updated the DCS Support in Table 23 from 5 Gbps to '6 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic t '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the partial reconfiguration is an advanced feature. Contact Alter for support of the feature. December 2012 2012.12.28 • Updated the GPIO and transceiver counts for the MBGA packages. • Updated the Vertical migration table for vertical migration of the U484 package of the Cyclone V E A9, C C9, and GT D9 devices. • Updated the Vertical migration table for vertical migration of the U484 packages. • Updated the Vertical migration table or vertical migration of the U484 packages for Cyclone V GX, and GT. November 2012 2012.11.19 • Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. • Updated the vertical migration table to add MBGA packages. • Added performance information for HPS memory controller. • Removed DDR3U support. • Updated Cyclone V ST speed grade information. • Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template. July 2012 2.1 </td <td></td> <td></td> <td>• Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.</td>			• Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.
 Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to (5.144 Gbps'). Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature. December 2012 2012.12.28 Updated the GPI0 and transceiver counts for the MBGA packages. Updated the GPI0 counts for the U484 package of the Cyclone V E A9, GC9, and GT D9 devices. Updated the GPI0 counts for the U484 package of the Updated the Updated the Vertical migration table for vertical migration of the U484 packages. Updated the MLAB supported programmable widths at 32 bits depth. November 2012 2012.11.19 Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added opering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added operformance information for HPS memory controller. Removed DDR3U support. Updated the or the differences between GPI0 reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			
'6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28Updated the GPIO and transceiver counts for the MBGA packages.Updated the GPIO counts for the U484 package of the Cyclone V E A9, GC 9, and GT D9 devices.Updated the vertical migration table for vertical migration of the U484 packages.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.November 20122012.11.19Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added onte on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added the "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.
Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28Updated the pin counts for the MBGA packages. Updated the GPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices. Updated the vertical migration table for vertical migration of the U484 packages. Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added performance information for HPS memory controller. Removed DDR3U support. Updated the vertical and update tables for Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPR 14 4.9152 Gbps transmit jitter compliance. Added template.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added table 1, Table 3, Table 16, Table 19, and Table 20.

C9, and GT D9 devices.
November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added performance information for HPS memory controller. Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added the "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and SUpdated the vertical migration table to add MBGA packages.Added performance information for HPS memory controller.Removed DDR3U support.Updated Cyclone V ST speed grade information.Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Updated the MLAB supported programmable widths at 32 bits depth.
• Updated the vertical migration table to add MBGA packages.• Added performance information for HPS memory controller.• Removed DDR3U support.• Updated Cyclone V ST speed grade information.• Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.• Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.• Updated template.July 20122.1June 20122.0• Restructured the document.• Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.• Added Table 1, Table 3, Table 16, Table 19, and Table 20.	November 2012	2012.11.19	 Added new MBGA packages and additional U484 packages for Cyclone V E, GX, and GT.
 Added performance information for HPS memory controller. Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			• Added ordering code for five-transceiver devices for Cyclone V GT and ST.
 Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			 Updated the vertical migration table to add MBGA packages.
• Updated Cyclone V ST speed grade information.• Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.• Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template.July 20122.1June 20122.0• Restructured the document. 			Added performance information for HPS memory controller.
 Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) Intersection of the difference. Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			
PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
User I/O numbers shown in the Quartus II software.Updated template.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.
July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 2.0 • Restructured the document. • Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
June 2012 2.0 • Restructured the document. • Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			•
 Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 	July 2012	2.1	Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)
Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.	June 2012	2.0	
• Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
 Updated Table 2, Table 4, Table 5, Table 6, Table 7, Table 8, Table 9, Table 10, Table 11, Table 12, Table 13, Table 14, Table 17, and Table 18. 			• Updated Table 2, Table 4, Table 5, Table 6, Table 7, Table 8, Table 9, Table

Date	Version	Changes
		 Updated Figure 1, Figure 2, Figure 3, Figure 4, Figure 5, Figure 6, and Figure 10. Updated the "FPGA Configuration and Processor Booting" and "Hardware and Software Development" sections. Text edits throughout the document.
February 2012	1.2	 Updated Table 1–2, Table 1–3, and Table 1–6. Updated "Cyclone V Family Plan" on page 1–4 and "Clock Networks and PLL Clock Sources" on page 1–15. Updated Figure 1–1 and Figure 1–6.
November 2011	1.1	 Updated Table 1–1, Table 1–2, Table 1–3, Table 1–4, Table 1–5, and Table 1–6. Updated Figure 1–4, Figure 1–5, Figure 1–6, Figure 1–7, and Figure 1–8. Updated "System Peripherals" on page 1–18, "HPS-FPGA AXI Bridges" on page 1–19, "HPS SDRAM Controller Subsystem" on page 1–19, "FPGA Configuration and Processor Booting" on page 1–19, and "Hardware and Software Development" on page 1–20. Minor text edits.
October 2011	1.0	Initial release.
