Intel - 5CGXFC9A6U19I7 Datasheet

Welcome to <u>E-XFL.COM</u>

Understanding <u>Embedded - FPGAs (Field</u> <u>Programmable Gate Array)</u>

Embedded - FPGAs, or Field Programmable Gate Arrays, are advanced integrated circuits that offer unparalleled flexibility and performance for digital systems. Unlike traditional fixed-function logic devices, FPGAs can be programmed and reprogrammed to execute a wide array of logical operations, enabling customized functionality tailored to specific applications. This reprogrammability allows developers to iterate designs quickly and implement complex functions without the need for custom hardware.

Applications of Embedded - FPGAs

The versatility of Embedded - FPGAs makes them indispensable in numerous fields. In telecommunications.

Details

Product Status	Active
Number of LABs/CLBs	113560
Number of Logic Elements/Cells	301000
Total RAM Bits	14251008
Number of I/O	240
Number of Gates	-
Voltage - Supply	1.07V ~ 1.13V
Mounting Type	Surface Mount
Operating Temperature	-40°C ~ 100°C (TJ)
Package / Case	484-FBGA
Supplier Device Package	484-UBGA (19x19)

Summary of Cyclone V Features

Table 2. Summary of Features for Cyclone V Devices

Feature	Description						
Technology	TSMC's 28-nm low-p1.1 V core voltage						
Packaging	 Multiple device densi different device dens 	Wirebond low-halogen packages Multiple device densities with compatible package footprints for seamless migration between different device densities RoHS-compliant and leaded ⁽¹⁾ options					
High-performance FPGA fabric	Enhanced 8-input ALM w	Enhanced 8-input ALM with four registers					
Internal memory blocks	 Memory logic array b 						
Embedded Hard IP blocks	Variable-precision DSP	 Native support for up to three signal processing precision levels (three 9 x 9, two 18 x 18, or one 27 x 27 multiplier) in the same variable-precision DSP block 64-bit accumulator and cascade Embedded internal coefficient memory Preadder/subtractor for improved efficiency 					
	Memory controller	DDR3, DDR2, and LPDDR2 with 16 and 32 bit ECC support					
	Embedded transceiver I/OPCI Express* (PCIe*) Gen2 and Gen1 (x1, x2, or x4) hard IP with multifunction support, endpoint, and root port						
Clock networks	, , , ,	l clock network d peripheral clock networks are not used can be powered down to reduce dynamic power					
Phase-locked loops (PLLs)	 Precision clock synth Integer mode and fra	esis, clock delay compensation, and zero delay buffering (ZDB) actional mode					
FPGA General-purpose I/Os (GPIOs)	 875 megabits per second (Mbps) LVDS receiver and 840 Mbps LVDS transmitter 400 MHz/800 Mbps external memory interface On-chip termination (OCT) 3.3 V support with up to 16 mA drive strength 						
Low-power high-speed serial interface	 614 Mbps to 6.144 Gbps integrated transceiver speed Transmit pre-emphasis and receiver equalization Dynamic partial reconfiguration of individual channels 						
HPS (Cyclone V SE, SX, and ST devices only)							
		-general-purpose timers, watchdog timers, direct memory access (DMA) iguration manager, and clock and reset managers

Feature	Description
	 HPS-FPGA bridges—include the FPGA-to-HPS, HPS-to-FPGA, and lightweight HPS-to-FPGA bridges that allow the FPGA fabric to issue transactions to slaves in the HPS, and vice versa FPGA-to-HPS SDRAM controller subsystem—provides a configurable interface to the multiport front end (MPFE) of the HPS SDRAM controller Arm CoreSight[™] JTAG debug access port, trace port, and on-chip trace storage
Configuration	 Tamper protection—comprehensive design protection to protect your valuable IP investments Enhanced advanced encryption standard (AES) design security features CvP Dynamic reconfiguration of the FPGA Active serial (AS) x1 and x4, passive serial (PS), JTAG, and fast passive parallel (FPP) x8 and x16 configuration options Internal scrubbing ⁽²⁾ Partial reconfiguration ⁽³⁾

Cyclone V Device Variants and Packages

Table 3. Device Variants for the Cyclone V Device Family

Variant	Description
Cyclone V E	Optimized for the lowest system cost and power requirement for a wide spectrum of general logic and DSP applications
Cyclone V GX	Optimized for the lowest cost and power requirement for 614 Mbps to 3.125 Gbps transceiver applications
Cyclone V GT	The FPGA industry's lowest cost and lowest power requirement for 6.144 Gbps transceiver applications
Cyclone V SE	SoC with integrated Arm-based HPS
Cyclone V SX	SoC with integrated Arm-based HPS and 3.125 Gbps transceivers
Cyclone V ST	SoC with integrated Arm-based HPS and 6.144 Gbps transceivers

Cyclone V E

I/O Vertical Migration for Cyclone V Devices

Figure 7. Vertical Migration Capability Across Cyclone V Device Packages and Densities

The arrows indicate the vertical migration paths. The devices included in each vertical migration path are shaded. You can also migrate your design across device densities in the same package option if the devices have the same dedicated pins, configuration pins, and power pins.

You can achieve the vertical migration shaded in red if you use only up to 175 GPIOs for the M383 package, and 138 GPIOs for the U672 package. These migration paths are not shown in the Intel Quartus Prime software Pin Migration View.

Note: To verify the pin migration compatibility, use the Pin Migration View window in the Intel Quartus Prime software Pin Planner.

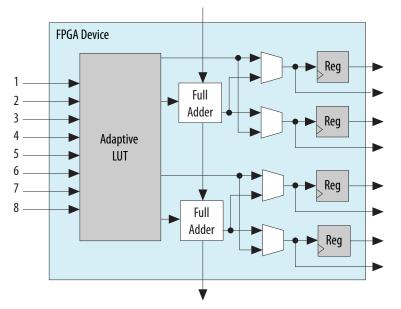

Adaptive Logic Module

Cyclone V devices use a 28 nm ALM as the basic building block of the logic fabric.

The ALM, as shown in following figure, uses an 8-input fracturable look-up table (LUT) with four dedicated registers to help improve timing closure in register-rich designs and achieve an even higher design packing capability than previous generations.

Figure 8. ALM for Cyclone V Devices

You can configure up to 25% of the ALMs in the Cyclone V devices as distributed memory using MLABs.

Related Information

Embedded Memory Capacity in Cyclone V Devices on page 21 Lists the embedded memory capacity for each device.

Variable-Precision DSP Block

Cyclone V devices feature a variable-precision DSP block that supports these features:

- Configurable to support signal processing precisions ranging from 9 x 9, 18 x 18 and 27 x 27 bits natively
- A 64-bit accumulator
- A hard preadder that is available in both 18- and 27-bit modes
- Cascaded output adders for efficient systolic finite impulse response (FIR) filters
- Internal coefficient register banks, 8 deep, for each multiplier in 18- or 27-bit mode
- Fully independent multiplier operation
- A second accumulator feedback register to accommodate complex multiplyaccumulate functions
- Fully independent Efficient support for single-precision floating point arithmetic
- The inferability of all modes by the Intel Quartus Prime design software

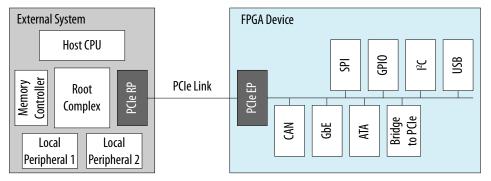

PCIe Gen1 and Gen2 Hard IP

Cyclone V GX, GT, SX, and ST devices contain PCIe hard IP that is designed for performance and ease-of-use. The PCIe hard IP consists of the MAC, data link, and transaction layers.

The PCIe hard IP supports PCIe Gen2 and Gen1 end point and root port for up to x4 lane configuration. The PCIe Gen2 x4 support is PCIe-compatible.

The PCIe endpoint support includes multifunction support for up to eight functions, as shown in the following figure. The integrated multifunction support reduces the FPGA logic requirements by up to 20,000 LEs for PCIe designs that require multiple peripherals.

Figure 9. PCIe Multifunction for Cyclone V Devices

The Cyclone V PCIe hard IP operates independently from the core logic. This independent operation allows the PCIe link to wake up and complete link training in less than 100 ms while the Cyclone V device completes loading the programming file for the rest of the device.

In addition, the PCIe hard IP in the Cyclone V device provides improved end-to-end datapath protection using ECC.

External Memory Interface

This section provides an overview of the external memory interface in Cyclone V devices.

Hard and Soft Memory Controllers

Cyclone V devices support up to two hard memory controllers for DDR3, DDR2, and LPDDR2 SDRAM devices. Each controller supports 8 to 32 bit components of up to 4 gigabits (Gb) in density with two chip selects and optional ECC. For the Cyclone V SoC devices, an additional hard memory controller in the HPS supports DDR3, DDR2, and LPDDR2 SDRAM devices.

All Cyclone V devices support soft memory controllers for DDR3, DDR2, and LPDDR2 SDRAM devices for maximum flexibility.

External Memory Performance

Table 20. External Memory Interface Performance in Cyclone V Devices

The maximum and minimum operating frequencies depend on the memory interface standards and the supported delay-locked loop (DLL) frequency listed in the device datasheet.

Interface	Voltage	Maximum Free	Minimum Frequency	
	(V)	Hard Controller	Soft Controller	(MHz)
DDR3 SDRAM	1.5	400	303	303
	1.35	400	303	303
DDR2 SDRAM	1.8	400	300	167
LPDDR2 SDRAM	1.2	333	300	167

Low-Power Serial Transceivers

Cyclone V devices deliver the industry's lowest power 6.144 Gbps transceivers at an estimated 88 mW maximum power consumption per channel. Cyclone V transceivers are designed to be compliant with a wide range of protocols and data rates.

Transceiver Channels

The transceivers are positioned on the left outer edge of the device. The transceiver channels consist of the physical medium attachment (PMA), physical coding sublayer (PCS), and clock networks.

PCS Support	Data Rates (Gbps)	Transmitter Data Path Feature	Receiver Data Path Feature
Serial ATA Gen1 and Gen2	1.5 and 3.0	 Custom PHY IP core with preset feature Electrical idle 	 Custom PHY IP core with preset feature Signal detect Wider spread of asynchronous SSC
CPRI 4.1 ⁽¹⁶⁾	0.6144 to 6.144	Dedicated deterministic latency PHY IP core	Dedicated deterministic latency PHY IP core
OBSAI RP3	0.768 to 3.072	Transmitter (TX) manual bit-slip mode	Receiver (RX) deterministic latency state machine
V-by-One HS	Up to 3.75	Custom PHY IP core	Custom PHY IP core
DisplayPort 1.2 ⁽¹⁷⁾	1.62 and 2.7		Wider spread of asynchronous SSC

SoC with HPS

Each SoC combines an FPGA fabric and an HPS in a single device. This combination delivers the flexibility of programmable logic with the power and cost savings of hard IP in these ways:

- Reduces board space, system power, and bill of materials cost by eliminating a discrete embedded processor
- Allows you to differentiate the end product in both hardware and software, and to support virtually any interface standard
- Extends the product life and revenue through in-field hardware and software updates

HPS Features

The HPS consists of a dual-core Arm Cortex-A9 MPCore processor, a rich set of peripherals, and a shared multiport SDRAM memory controller, as shown in the following figure.

⁽¹⁶⁾ High-voltage output mode (1000-BASE-CX) is not supported.

⁽¹⁷⁾ Pending characterization.

Note: Although the FPGA fabric and HPS are on separate power domains, the HPS must remain powered up during operation while the FPGA fabric can be powered up or down as required.

Related Information

Cyclone V Device Family Pin Connection Guidelines

Provides detailed information about power supply pin connection guidelines and power regulator sharing.

Hardware and Software Development

For hardware development, you can configure the HPS and connect your soft logic in the FPGA fabric to the HPS interfaces using the Platform Designer (Standard) system integration tool in the Intel Quartus Prime software.

For software development, the Arm-based SoC devices inherit the rich software development ecosystem available for the Arm Cortex-A9 MPCore processor. The software development process for Intel SoCs follows the same steps as those for other SoC devices from other manufacturers. Support for Linux, VxWorks[®], and other operating systems is available for the SoCs. For more information on the operating systems support availability, contact the Intel sales team.

You can begin device-specific firmware and software development on the Intel SoC Virtual Target. The Virtual Target is a fast PC-based functional simulation of a target development system—a model of a complete development board that runs on a PC. The Virtual Target enables the development of device-specific production software that can run unmodified on actual hardware.

Dynamic and Partial Reconfiguration

The Cyclone V devices support dynamic reconfiguration and partial reconfiguration.

Dynamic Reconfiguration

The dynamic reconfiguration feature allows you to dynamically change the transceiver data rates, PMA settings, or protocols of a channel, without affecting data transfer on adjacent channels. This feature is ideal for applications that require on-the-fly multiprotocol or multirate support. You can reconfigure the PMA and PCS blocks with dynamic reconfiguration.

Partial Reconfiguration

Note: The partial reconfiguration feature is available for Cyclone V E, GX, SE, and SX devices with the "SC" suffix in the part number. For device availability and ordering, contact your local Intel sales representatives.

Partial reconfiguration allows you to reconfigure part of the device while other sections of the device remain operational. This capability is important in systems with critical uptime requirements because it allows you to make updates or adjust functionality without disrupting services.

Power Management

Leveraging the FPGA architectural features, process technology advancements, and transceivers that are designed for power efficiency, the Cyclone V devices consume less power than previous generation Cyclone FPGAs:

- Total device core power consumption—less by up to 40%.
- Transceiver channel power consumption—less by up to 50%.

Additionally, Cyclone V devices contain several hard IP blocks that reduce logic resources and deliver substantial power savings of up to 25% less power than equivalent soft implementations.

Document Revision History for Cyclone V Device Overview

Document Version	Changes
2018.05.07	 Added the low power option ("L" suffix) for Cyclone V SE and Cyclone V SX devices in the Sample Ordering Code and Available Options diagrams. Rebranded as Intel.

Date	Version	Changes
December 2017	2017.12.18	Updated ALM resources for Cyclone V E, Cyclone V SE, Cyclone V SX, and Cyclone V ST devices.
June 2016	2016.06.10	Updated Cyclone V GT speed grade to -7 in Sample Ordering Code and Available Options for Cyclone V GT Devices diagram.
December 2015	2015.12.21	 Added descriptions to package plan tables for Cyclone V GT and ST devices. Changed instances of <i>Quartus II</i> to <i>Quartus Prime</i>.
June 2015	2015.06.12	 Replaced a note to partial reconfiguration feature. Note: The partial reconfiguration feature is available for Cyclone V E, GX, SE, and SX devices with the "SC" suffix in the part number. For device availability and ordering, contact your local Altera sales representatives. Updated logic elements (LE) (K) for the following devices: Cyclone V E A7: Updated from 149.5 to 150 Cyclone V GX C3: Updated from 149.7 to 150 Cyclone V GT D7: Updated from 149.5 to 150 Cyclone V GT D7: Updated from 149.5 to 150 Updated MLAB (Kb) in Maximum Resource Counts for Cyclone V GX Devices table as follows: Cyclone V GX C3: Updated from 291 to 182 Cyclone V GX C4: Updated from 678 to 424 Cyclone V GX C7: Updated from 1,338 to 836 Cyclone V GX C9: Updated from 1,717
	1	continued

Cyclone V Device Overview CV-51001 | 2018.05.07

•Updated MLAB RAM Bit (KD) in Embedded Memory Capacity and Distribution in Cyclone V GX G3: Updated from 181 to 182 - Cyclone V GX G4: Updated from 25 to 243 • Updated Total RAM Bit (KD) in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: - Cyclone V GX G3: Updated from 1,531 to 1,532 - Cyclone V GX G4: Updated from 2,795 to 2,924March 20152015.03.31• Added Internal Scrubbing Fedure under configuration in Summary of Fedures for Cyclone V Devices table as follows: - Cyclone V GX G4: Updated from 7,975 to 2,824 - Cyclone V GX G4: Updated from 7,975 to 2,824 - Cyclone V GX G4: Updated from 7,975 to 788 - Cyclone V GX G4: Updated from 797 to 678March 20152015.03.31• Added internal scrubbing fedure under configuration in Summary of Fedures for Cyclone V Devices table. - Added optional suffix "SC: Internal scrubbing fedure under configuration in Summary of Fedures for Cyclone V GX G3: Updated from 679 to 678January 20152015.01.23• Updated Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V SX Devices - Sample Ordering Code and Available Options for Cyclone V ST Devices - Operating Temperature: Removed C and A temperature grades - Updated the transceiver specification for Cyclone V ST Devices - Sample Ordering Code and Available Options for Cyclone V ST Devices - Device Variants for the Cyclone V Device Family table - Device Variants for the Cyclone V Device Family table - Device Variants for the Cyclone V ST Devices - Device Variants for the Cyclone V Device Family table - Device Variants for Cyclone V Device Tamily table	Date	Version	Changes
Features for Cyclone V Devices table.• Added optional suffix "SC: Internal scrubbing support" to the following diagrams:- Sample Ordering Code and Available Options for Cyclone V E Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V SX Devices- Sample Ordering Code and Available Options for Cyclone V STDevices figure because Cyclone V ST devices are only available in 1 temperature grade and -7 speed grade Operating Temperature: Removed C and A temperature grades- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver specification for Cyclone V ST Devices- Updated the transceiver counts for Cyclone V ST Devices- Updated Maximum Resource Counts for Cyclone V ST Devices- Logic elements (LE) (K): Updated from 51 to 57- 18 × 18 multiplier: Updated from 51 to 57- 9 × 9 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 134 bit Input: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 134 bit 17- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier: Updated from 51 to 57- 18 × 18 Multiplier:			 Distribution in Cyclone V Devices table as follows: Cyclone V GX C3: Updated from 181 to 182 Cyclone V GX C4: Updated from 295 to 424 Updated Total RAM Bit (Kb) in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C3: Updated from 1,531 to 1,532 Cyclone V GX C4: Updated from 2,795 to 2,924 Updated MLAB Block count in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C4: Updated from 2,795 to 2,924 Updated MLAB Block count in Embedded Memory Capacity and Distribution in Cyclone V Devices table as follows: Cyclone V GX C4: Updated from 472 to 678
Devices figure because Cyclone V ST devices are only available in 1 temperature grade and -7 speed grade. 	March 2015	2015.03.31	 Features for Cyclone V Devices table. Added optional suffix "SC: Internal scrubbing support" to the following diagrams: Sample Ordering Code and Available Options for Cyclone V E Devices Sample Ordering Code and Available Options for Cyclone V GX Devices Sample Ordering Code and Available Options for Cyclone V SE Devices
	January 2015	2015.01.23	 Devices figure because Cyclone V ST devices are only available in I temperature grade and -7 speed grade. Operating Temperature: Removed C and A temperature grades FPGA Fabric Speed Grade: Removed -6 and -8 speed grades Updated the transceiver specification for Cyclone V ST from 5 Gbps to 6.144 Gbps: Device Variants for the Cyclone V Device Family table Sample Ordering Code and Available Options for Cyclone V ST Devices figure Maximum Resource Counts for Cyclone V ST Devices Updated Maximum Resource Counts for Cyclone V GX Devices table for Cyclone V GX G3 devices. Logic elements (LE) (K): Updated from 35.7 to 35.5 Variable-precision DSP block: Updated from 51 to 57 18 × 18 multiplier: Updated from 102 to 114 Updated Number of Multipliers in Cyclone V Devices table for Cyclone V GX G3 devices. Variableprecision DSP Block: Updated from 51 to 57 9 × 9 Multiplier: Updated from 153 to 171 18 × 18 Multiplier: Updated from 102 to 114 27 × 27 Multiplier: Updated from 51 to 57 18 × 18 Multiplier Adder Mode: Updated from 51 to 57 18 × 18 Multiplier Adder Summed with 36 bit Input: Updated from 51 to 57 18 × 18 Multiplier Adder Summed with 36 bit Input: Updated from 51 to 57 M10K RAM bit (Kb): Updated from 1,190 to 1,350 MLAB block: Updated from 255 to 291 MLAB RAM bit (Kb): Updated from 159 to 181
	October 2014	2014.10.06	

aid A6. Updated Memory (Kb) for Maximum Resource Counts for Cyclone V SE A and A6, SX C4 and C6, ST D6 devices. Updated PGA PLL for Maximum Resource Counts for Cyclone V SE A2, S (2, devices. Removed '36 x 36' from the Variable-Precision DSP Block. Updated HPG PLL for Maximum Resource Counts for Cyclone V SE A4, SC (2, devices. Not and ST devices. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SS, C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated HPS I/O counts for Cyclone V SX C4 device. Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. Removed 'Gounter reconfiguration from the PLL Features. Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. Updated the Capability in Table 23 of SGbps and 6 Gbps Basic 1 '5.144 Gbps. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the partial reconfiguration is an advanced feature. Contact Atte for support of the Feature. December 2012 2012.12.28 Updated the QFD counts for the MBGA packages. Updated the option counts for the MBGA packages. Updated the QFD counts for the V484 package of the Cyclone V E A9, C (9, and GT) ad devices. November 2012 2012.11.19 Added new MBGA packages and additional U484 packages for Cyclone V GA, and GT. <th>Date</th> <th>Version</th> <th>Changes</th>	Date	Version	Changes
and A6, SX C4 and C6, ST D6 devices.Updated PGA PLL for Maximum Resource Counts for Cyclone V SE A2, SC (2, devices).Removed '26 x 36' from the Variable-Precision DSP Block.Updated Variable-precision DSP Blocks and 18 x 18 Multiplier for Maximum Resource Counts for Cyclone V SX C4 device.Updated Table 17 for Cyclone V SX C4 device.Updated Table 17 for Cyclone V SX C4 device.Updated Enbedded Memory Capacity and Distribution table.Updated Enbedded Memory Capacity and Distribution table for Cyclone V SK C4 device.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps.Updated the Capability in Table 22 of Ring oscillator transmit PLs with 6.144 Gbps.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CRI 4.1 to '6.144 Gbps'.Updated the GPIO counts for the MBGA packages.Updated the GPIO counts for the VBA package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the GPIO counts for the VBA package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the Wertical migration table for vertical migration of the U484 package.Updated the WBGA packages and additional U484 packages for Cyclone V GX and GT.Added ordering code for five-transceiver devices for Cyclone V GX and CFI.Updated the Vertical migration table to add MBGA packages.Adde			and A6.
C2, devices. • Removed '36 x 36' from the Variable-Precision DSP Block. Updated Variable-precision DSP Blocks and 18 x 18 Multiplier for Maximum Resource Counts for Cyclone V SX C4 device. • Updated the HPS I/O counts for Cyclone V SX C4 device. Updated Table 17 for Cyclone V SX C4 device. • Updated Table 17 for Cyclone V SX C4 device. Updated Table 17 for Cyclone V SX C4 device. • Updated Table 17 for Cyclone V SX C4 device. • Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. • Removed 'Ounter reconfiguration' from the PLL Features. • Updated Low-Power Serial Transceivers by replacing 5 Gbps soluth 6.144 Gbps. • Updated Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Capability in Table 23 of CPR 14.1 to '6.144 Gbps'. • Updated the PCS Support in Table 23 of CPR 14.1 to '6.144 Gbps'. • Updated the GPS • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the Gps'. • Updated the GPS'. • Updated the Gps'. • Updated the GPIO counts for the MBGA packages. • Updated the GPIO counts for the U484 package of the Cyclone V E A9, G S, and GT D9 devices. • Updated the GPIO counts for the U484 packages for Cyclone V G A9, G S, and GT D9 devices. </td <td></td> <td></td> <td></td>			
Image: Section DSP Blocks and 18 x 18 Multiplier for Maximum Resource Counts for Cyclone V SX C4 device. Updated the HPS I/O counts for Cyclone V SX C4 device. Updated Table 17 for Cyclone V SX C4 device. Updated Low-Power Serlal Transceivers by replacing 5 Gbps with 6.144 Gbps. Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. Updated the Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps'. Updated the DCS Support in Table 23 of CPR 14.1 to '6.144 Gbps'. Updated the DCS Support in Table 23 of CPR 14.1 to '6.144 Gbps'. Updated the DCS Support of the feature. Contact Alte for Support of the feature. Updated the CPCS ontorfiguration is an advanced feature. Contact Alte for Support of the feature.December 20122012.12.28Updated the GPIO ant fransceiver counts for the MBGA packages. Updated the GPIO and transceiver counts for the MBGA packages. Updated the GPIO and transceiver counts for the MBGA packages. Updated the Vertical migration table for vertical migration of the U484 packages. Updated the Vertical migration table 42 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V G7 and S Updated the vertical migration table to add MBGA packages. Updated the VHLB support. Updated the VHLB support. Updated the VHLB support. Updated Cyclone V S1 Speed grade information. Added information or HPB secover dol R33 upport. Updated Cyclone V S1 Speed grade inform			Updated FPGA PLL for Maximum Resource Counts for Cyclone V SE A2, SX C2, devices.
Maximum Resource Counts for Cyclone V SE, SX, and ST device.Updated He HPS I/O counts for Cyclone V SE, SX, and ST devices.Updated Table 17 for Cyclone V SX C4 device.Updated Embedded Memory Capacity and Distribution table for CycloneSE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with6.144 Gbps.Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 from 5 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1'6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the OPIO counts for the MBGA packages.Updated the GPIO and transceiver counts for the MBGA packages.Updated the GPIO and transceiver counts for the U484 package of the Cyclone V E A9, CC9, and GT D9 devices.Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added ordering code for five-transceiver devices for Cyclone V GT and SUpdated the vertical migration table to add MBGA packages.Updated the outring of the HSGA packages.Updated the outring on an animum transceiver channel usage restrictions for CC Gen2 and CPRI at 4.9152 Gbps transmi jitter compliance.Added ordering code for five-transceiver devices for Cyclone			• Removed '36 x 36' from the Variable-Precision DSP Block.
• Updated Figure 7 which shows the I/O vertical migration table. • Updated Table 17 for Cyclone V SX C4 device. • Updated Embedded Memory Capacity and Distribution table for Cyclone SE A4 and A6, SX C4 and C6, ST D6 devices. • Removed 'Counter reconfiguration' from the PLL Features. • Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps. • Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the OPIO counts for the MBGA packages. • Updated the GPIO and transceiver counts for the MBGA packages. • Updated the Vertical migration table for vertical migration of the U484 packages. • Updated the WIGA packages and additional U484 packages for Cyclone V GX, and GT. • Added orderining code for five-transceiver			
Image: Section of the section of th			• Updated the HPS I/O counts for Cyclone V SE, SX, and ST devices.
Updated Embedded Memory Capacity and Distribution table for Cyclone SE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Removed 'Distributed Memory' symbol.Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps'.Updated the DCS Support in Table 23 for 5 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basis ti '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the QPIO counts for the MBGA packages.Updated the QPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the QPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.November 20122012.11.19Added new MGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI 4 4.9152 Gbps transmit jitter compliance.November 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0			• Updated Figure 7 which shows the I/O vertical migration table.
SE A4 and A6, SX C4 and C6, ST D6 devices.Removed 'Counter reconfiguration' from the PLL Features.Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.Updated Low-Power 20isributed Memory' symbol.Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.Updated the Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.Updated the PCS Support in Table 23 for 0 Gbps to '6 Gbps'.Updated the Data Rates (Gbps) in Table 23 of 2 GPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature.December 20122012.12.28Updated the GPIO counts for the MBGA packages.Updated the GPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added information on maximum transceiver channel usage restrictions f PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance			Updated Table 17 for Cyclone V SX C4 device.
•Updated Low-Power Serial Transceivers by replacing 5 Gbps with 6.144 Gbps.•Removed "Distributed Memory' symbol.•Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated the CGS Support in Table 23 form 5 Gbps to '6 Gbps'.•Updated the PCS Support in Table 23 form 5 Gbps to '6 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic 1 '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Updated the PCI and ratical reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28•Updated the GPIO counts for the MBGA packages.•Updated the GPIO counts for the U484 package of the Cyclone V E A9, CC (C9, and GT D9 devices.•Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19•Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.•Updated Cyclone V ST speed grade information.•Added ordering code for five-transceiver devices for Cyclone V GT and S · Updated the vertical migration and information.•Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.•Added order ing code for five-transceiver devices for Cyclone V GT and S · Updated the vertical migration on maximum transceiver controller.•Removed			Updated Embedded Memory Capacity and Distribution table for Cyclone V SE A4 and A6, SX C4 and C6, ST D6 devices.
6.144 Gbps. Removed 'Distributed Memory' symbol. Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'. Updated the Capability in Table 23 from 5 Gbps to '6 Gbps'. Updated the PCS Support in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of 2 GPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature. December 2012 2012.12.28 Updated the GPIO and transceiver counts for the MBGA packages. Updated the GPIO and transceiver counts for the U484 package of the Cyclone V E A9, C C, O, and GT D9 devices. Updated the Vertical migration table for vertical migration of the U484 packages. Updated the MLB supported programmable widths at 32 bits depth. November 2012 2012.11.19 Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPR			Removed 'Counter reconfiguration' from the PLL Features.
•Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.•Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.•Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.•Clarified that partial reconfiguration is an advanced feature. Contact Alte for support of the feature.December 20122012.12.28Updated the GPIO counts for the MBGA packages. 			
Updated Capability in Table 22 of Ring oscillator transmit PLLs with 6.144 Gbps.Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.Updated the PCS Support in Table 23 of 3 Gbps and 6 Gbps Basic t '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.December 20122012.12.28Updated the pin counts for the MBGA packages.Updated the GPIO and transceiver counts for the MBGA packages.Updated the CPI Counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Updated the CPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices.Vupdated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added performance information for HPS memory controller.Removed DDR3U support.Updated Cryclone V ST speed grade information.Added information on maximum transceiver channel usage restrictions fo PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Removed 'Distributed Memory' symbol.
6.144 Gbps. • Updated the DCS Support in Table 23 from 5 Gbps to '6 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic t '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. • Updated the partial reconfiguration is an advanced feature. Contact Alter for support of the feature. December 2012 2012.12.28 • Updated the GPIO and transceiver counts for the MBGA packages. • Updated the Vertical migration table for vertical migration of the U484 package of the Cyclone V E A9, C C9, and GT D9 devices. • Updated the Vertical migration table for vertical migration of the U484 packages. • Updated the Vertical migration table or vertical migration of the U484 packages for Cyclone V GX, and GT. November 2012 2012.11.19 • Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. • Updated the vertical migration table to add MBGA packages. • Added performance information for HPS memory controller. • Removed DDR3U support. • Updated Cyclone V ST speed grade information. • Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template. July 2012 2.1 </td <td></td> <td></td> <td>• Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.</td>			• Updated the Capability in Table 22 of Backplane support to '6.144 Gbps'.
 Updated the Data Rates (Gbps) in Table 23 of 3 Gbps and 6 Gbps Basic to (5.144 Gbps'). Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'. Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature. December 2012 2012.12.28 Updated the GPI0 and transceiver counts for the MBGA packages. Updated the GPI0 counts for the U484 package of the Cyclone V E A9, GC9, and GT D9 devices. Updated the GPI0 counts for the U484 package of the Updated the Updated the Vertical migration table for vertical migration of the U484 packages. Updated the MLAB supported programmable widths at 32 bits depth. November 2012 2012.11.19 Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added opering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added operformance information for HPS memory controller. Removed DDR3U support. Updated the or the differences between GPI0 reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			
'6.144 Gbps'.Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28Updated the GPIO and transceiver counts for the MBGA packages.Updated the GPIO counts for the U484 package of the Cyclone V E A9, GC 9, and GT D9 devices.Updated the vertical migration table for vertical migration of the U484 packages.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.November 20122012.11.19Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages.Added ordering code for five-transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added onte on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added the "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Updated the PCS Support in Table 23 from 5 Gbps to '6 Gbps'.
Clarified that partial reconfiguration is an advanced feature. Contact Alter for support of the feature.December 20122012.12.28Updated the pin counts for the MBGA packages. Updated the GPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices. Updated the vertical migration table for vertical migration of the U484 packages. Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added performance information for HPS memory controller. Removed DDR3U support. Updated the vertical and update tables for Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPR 14 4.9152 Gbps transmit jitter compliance. Added template.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added table 1, Table 3, Table 16, Table 19, and Table 20.			
for support of the feature.December 20122012.12.28Updated the pin counts for the MBGA packages. Updated the GPIO and transceiver counts for the MBGA packages. Updated the GPIO counts for the U484 package of the Cyclone V E A9, C C9, and GT D9 devices. Updated the vertical migration table for vertical migration of the U484 packages. Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19• Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. • Added ordering code for five-transceiver devices for Cyclone V GT and S* Updated the vertical migration table to add MBGA packages. • Added performance information for HPS memory controller. • Removed DDR3U support. • Updated information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. • Added onte on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0• Restructured the document. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			• Updated the Data Rates (Gbps) in Table 23 of CPRI 4.1 to '6.144 Gbps'.
• Updated the GPIO and transceiver counts for the MBGA packages.• Updated the GPIO counts for the U484 package of the Cyclone V E A9, G C9, and GT D9 devices.• Updated the vertical migration table for vertical migration of the U484 packages.• Updated the vertical migration table for vertical migration of the U484 packages.• Updated the vertical migration table for vertical migration of the U484 packages.• Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19• Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.• Added ordering code for five-transceiver devices for Cyclone V GT and S • Updated the vertical migration table to add MBGA packages.• Added performance information for HPS memory controller.• Removed DDR3U support.• Updated Cyclone V ST speed grade information.• Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIE Gen2 x4 lane configuration (PCIe-compatible)June 20122.0• Restructured the document.• Added the "Embedded Memory Configurations" sections.• Added Table 1, Table 3, Table 16, Table 19, and Table 20.			 Clarified that partial reconfiguration is an advanced feature. Contact Altera for support of the feature.
Updated the GPIO counts for the U484 package of the Cyclone V E A9, G C9, and GT D9 devices.Updated the vertical migration table for vertical migration of the U484 packages.Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S 	December 2012	2012.12.28	Updated the pin counts for the MBGA packages.
C9, and GT D9 devices.Updated the vertical migration table for vertical migration of the U484 packages.Updated the MLAB supported programmable widths at 32 bits depth.November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and S'Updated the vertical migration table to add MBGA packages.Added performance information for HPS memory controller.Removed DDR3U support.Updated Cyclone V ST speed grade information.Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added template.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
packages.November 20122012.11.19• Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. • Added ordering code for five-transceiver devices for Cyclone V GT and S • Updated the vertical migration table to add MBGA packages. • Added performance information for HPS memory controller. • Removed DDR3U support. • Updated Cyclone V ST speed grade information. • Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. • Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0• Restructured the document. • Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			C9, and GT D9 devices.
November 20122012.11.19Added new MBGA packages and additional U484 packages for Cyclone V GX, and GT. Added ordering code for five-transceiver devices for Cyclone V GT and S Updated the vertical migration table to add MBGA packages. Added performance information for HPS memory controller. Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document. Added the "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
GX, and GT.Added ordering code for five-transceiver devices for Cyclone V GT and SUpdated the vertical migration table to add MBGA packages.Added performance information for HPS memory controller.Removed DDR3U support.Updated Cyclone V ST speed grade information.Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			Updated the MLAB supported programmable widths at 32 bits depth.
• Updated the vertical migration table to add MBGA packages.• Added performance information for HPS memory controller.• Removed DDR3U support.• Updated Cyclone V ST speed grade information.• Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.• Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.• Updated template.July 20122.1June 20122.0• Restructured the document.• Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.• Added Table 1, Table 3, Table 16, Table 19, and Table 20.	November 2012	2012.11.19	 Added new MBGA packages and additional U484 packages for Cyclone V E, GX, and GT.
 Added performance information for HPS memory controller. Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			• Added ordering code for five-transceiver devices for Cyclone V GT and ST.
 Removed DDR3U support. Updated Cyclone V ST speed grade information. Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			 Updated the vertical migration table to add MBGA packages.
• Updated Cyclone V ST speed grade information.• Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.• Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. • Updated template.July 20122.1June 20122.0• Restructured the document. 			Added performance information for HPS memory controller.
 Added information on maximum transceiver channel usage restrictions for PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance. Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software. Updated template. July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) Intersection and the difference. Restructured the document. Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 			
PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.Added note on the differences between GPIO reported in Overview with User I/O numbers shown in the Quartus II software.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
User I/O numbers shown in the Quartus II software.Updated template.July 20122.1Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)June 20122.0Restructured the document.Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.			PCI Gen2 and CPRI at 4.9152 Gbps transmit jitter compliance.
July 2012 2.1 Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible) June 2012 2.0 • Restructured the document. • Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
June 2012 2.0 • Restructured the document. • Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. • Added Table 1, Table 3, Table 16, Table 19, and Table 20.			•
 Added the "Embedded Memory Capacity" and "Embedded Memory Configurations" sections. Added Table 1, Table 3, Table 16, Table 19, and Table 20. 	July 2012	2.1	Added support for PCIe Gen2 x4 lane configuration (PCIe-compatible)
Configurations" sections.Added Table 1, Table 3, Table 16, Table 19, and Table 20.	June 2012	2.0	
• Added Table 1, Table 3, Table 16, Table 19, and Table 20.			
 Updated Table 2, Table 4, Table 5, Table 6, Table 7, Table 8, Table 9, Table 10, Table 11, Table 12, Table 13, Table 14, Table 17, and Table 18. 			• Updated Table 2, Table 4, Table 5, Table 6, Table 7, Table 8, Table 9, Table
