What is "Embedded - Microcontrollers"?

"Embedded - Microcontrollers" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

3. ELECTRICAL SPECIFICATIONS (G: INDUSTRIAL APPLICATIONS T_A = -40 to +105°C)

This chapter describes the following electrical specifications.

Target products G: Industrial applications T_A = –40 to +105°C
R5F100xxGxx

Cautions 1. The RL78 microcontrollers have an on-chip debug function, which is provided for development and evaluation. Do not use the on-chip debug function in products designated for mass production, because the guaranteed number of rewritable times of the flash memory may be exceeded when this function is used, and product reliability therefore cannot be guaranteed. Renesas Electronics is not liable for problems occurring when the on-chip debug function is used.

2. With products not provided with an EV_{DD0}, EV_{DD1}, EV_{SS0}, or EV_{SS1} pin, replace EV_{DD0} and EV_{DD1} with V_{DD}, or replace EV_{SS0} and EV_{SS1} with V_{SS}.

3. The pins mounted depend on the product. Refer to 2.1 Port Function to 2.2.1 Functions for each product.

4. Please contact Renesas Electronics sales office for derating of operation under T_A = +85°C to +105°C. Derating is the systematic reduction of load for the sake of improved reliability.

Remark When RL78/G13 is used in the range of T_A = –40 to +85°C, see **CHAPTER 2 ELECTRICAL SPECIFICATIONS (T_A = –40 to +85°C)**.

There are following differences between the products "G: Industrial applications (T_A = –40 to +105°C)" and the products “A: Consumer applications, and D: Industrial applications”.
