

Welcome to **E-XFL.COM**

What is "Embedded - Microcontrollers"?

"Embedded - Microcontrollers" refer to small, integrated circuits designed to perform specific tasks within larger systems. These microcontrollers are essentially compact computers on a single chip, containing a processor core, memory, and programmable input/output peripherals. They are called "embedded" because they are embedded within electronic devices to control various functions, rather than serving as standalone computers. Microcontrollers are crucial in modern electronics, providing the intelligence and control needed for a wide range of applications.

Applications of "<u>Embedded - Microcontrollers</u>"

Details	
Product Status	Active
Core Processor	R8C
Core Size	16-Bit
Speed	20MHz
Connectivity	I ² C, LINbus, SIO, SSU, UART/USART
Peripherals	POR, PWM, Voltage Detect, WDT
Number of I/O	71
Program Memory Size	128KB (128K x 8)
Program Memory Type	FLASH
EEPROM Size	-
RAM Size	7.5K x 8
Voltage - Supply (Vcc/Vdd)	2.2V ~ 5.5V
Data Converters	A/D 20x10b; D/A 2x8b
Oscillator Type	Internal
Operating Temperature	-40°C ~ 85°C (TA)
Mounting Type	Surface Mount
Package / Case	80-LQFP
Supplier Device Package	80-LQFP (12x12)
Purchase URL	https://www.e-xfl.com/product-detail/renesas-electronics-america/r5f212dcsdfp-v2

Email: info@E-XFL.COM

Address: Room A, 16/F, Full Win Commercial Centre, 573 Nathan Road, Mongkok, Hong Kong

Notice

- 1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
- Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights
 of third parties by or arising from the use of Renesas Electronics products or technical information described in this document.
 No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights
 of Renesas Electronics or others.
- 3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
- 4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
- 5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
- 6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
- 7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
 - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
 - "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
 - "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
- 8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
- 9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
- 10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
- 11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics
- 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.
- (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.
- (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

Table 1.3 Specifications for R8C/2D Group (1)

Item	Function	Specification
CPU	Central processing	R8C/Tiny series core
	unit	Number of fundamental instructions: 89
	unit	Minimum instruction execution time:
		50 ns (f(XIN) = 20 MHz, VCC = 3.0 to 5.5 V)
		100 ns (f(XIN) = 10 MHz, VCC = 2.7 to 5.5 V)
		200 ns (f(XIN) = 5 MHz, VCC = 2.2 to 5.5 V)
		• Multiplier: 16 bits × 16 bits → 32 bits
		• Multiply-accumulate instruction: 16 bits × 16 bits + 32 bits → 32 bits
		Operation mode: Single-chip mode (address space: 1 Mbyte)
Memory	ROM, RAM	Refer to Table 1.6 Product List for R8C/2D Group.
Power Supply	Voltage detection	Power-on reset
Voltage	circuit	Voltage detection 3
Detection		
I/O Ports	Programmable I/O	Input-only: 2 pins
	ports	CMOS I/O ports: 71, selectable pull-up resistor
		High current drive ports: 8
Clock	Clock generation	3 circuits: XIN clock oscillation circuit (with on-chip feedback resistor),
	circuits	On-chip oscillator (high-speed, low-speed)
		(high-speed on-chip oscillator has a frequency adjustment function),
		XCIN clock oscillation circuit (32 kHz)
		Oscillation stop detection: XIN clock oscillation stop detection function
		• Frequency divider circuit: Dividing selectable 1, 2, 4, 8, and 16
		Low power consumption modes:
		Standard operating mode (high-speed clock, low-speed clock, high-speed
		on-chip oscillator, low-speed on-chip oscillator), wait mode, stop mode
		Real-time clock (timer RE)
Interrupts		External: 5 sources, Internal: 23 sources, Software: 4 sources
•		Priority levels: 7 levels
Watchdog Time	er	15 bits × 1 (with prescaler), reset start selectable
Timer	Timer RA	8 bits × 1 (with 8-bit prescaler)
		Timer mode (period timer), pulse output mode (output level inverted every
		period), event counter mode, pulse width measurement mode, pulse period
		measurement mode
	Timer RB	8 bits x 1 (with 8-bit prescaler)
		Timer mode (period timer), programmable waveform generation mode (PWM
		output), programmable one-shot generation mode, programmable wait one-
		shot generation mode
	Timer RC	16 bits x 1 (with 4 capture/compare registers)
		Timer mode (input capture function, output compare function), PWM mode
		(output 3 pins), PWM2 mode (PWM output pin)
	Timer RD	16 bits × 2 (with 4 capture/compare registers)
		Timer mode (input capture function, output compare function), PWM mode
		(output 6 pins), reset synchronous PWM mode (output three-phase
		waveforms (6 pins), sawtooth wave modulation), complementary PWM mode
		(output three-phase waveforms (6 pins), triangular wave modulation), PWM3
		mode (PWM output 2 pins with fixed period)
	Timer RE	8 bits × 1
		Real-time clock mode (count seconds, minutes, hours, days of week), output
		compare mode
	Timer RF	16 bits × 1 (with capture/compare register pin and compare register pin)
		Input capture mode, output compare mode

1.2 Product List

Table 1.5 lists Product List for R8C/2C Group, Figure 1.1 shows a Part Number, Memory Size, and Package of R8C/2C Group, Table 1.6 lists Product List for R8C/2D Group, and Figure 1.2 shows a Part Number, Memory Size, and Package of R8C/2D Group.

44		P4_5	INT0	ĪNT0	TV2 4			
45		P6_6	INT2		TXD1			

NOTE:

1. Can be assigned to the pin in parentheses by a program.

2.8.7 Interrupt Enable Flag (I)

The I flag enables maskable interrupts.

Interrupt are disabled when the I flag is set to 0, and are enabled when the I flag is set to 1. The I flag is set to 0 when an interrupt request is acknowledged.

2.8.8 Stack Pointer Select Flag (U)

ISP is selected when the U flag is set to 0; USP is selected when the U flag is set to 1.

The U flag is set to 0 when a hardware interrupt request is acknowledged or the INT instruction of software interrupt numbers 0 to 31 is executed.

2.8.9 Processor Interrupt Priority Level (IPL)

IPL is 3 bits wide and assigns processor interrupt priority levels from level 0 to level 7. If a requested interrupt has higher priority than IPL, the interrupt is enabled.

2.8.10 Reserved Bit

If necessary, set to 0. When read, the content is undefined.

3.2 R8C/2D Group

Figure 3.2 is a Memory Map of R8C/2D Group. The R8C/2D group has 1 Mbyte of address space from addresses 00000h to FFFFFh.

The internal ROM (program ROM) is allocated lower addresses, beginning with address 0FFFFh. For example, a 48-Kbyte internal ROM area is allocated addresses 04000h to 0FFFFh.

The fixed interrupt vector table is allocated addresses 0FFDCh to 0FFFFh. They store the starting address of each interrupt routine.

The internal ROM (data flash) is allocated addresses 02400h to 02BFFh.

The internal RAM area is allocated higher addresses, beginning with address 00400h. For example, a 2.5-Kbyte internal RAM is allocated addresses 00400h to 00DFFh. The internal RAM is used not only for storing data but also for calling subroutines and as stacks when interrupt requests are acknowledged.

Special function registers (SFRs) are allocated addresses 00000h to 002FFh. The peripheral function control registers are allocated here. All addresses within the SFR, which have nothing allocated are reserved for future use and cannot be accessed by users.

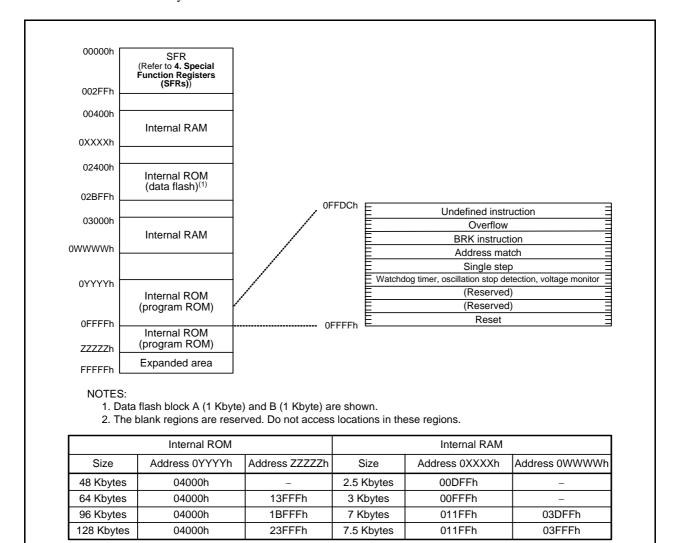

Figure 3.2 Memory Map of R8C/2D Group

Special Function Registers (SFRs) 4.

An SFR (special function register) is a control register for a peripheral function. Tables 4.1 to 4.12 list the special function registers.

X: Undefined
NOTES:

1. The blank regions are reserved. Do not access locations in these regions.
2. The OFS register cannot be changed by a program. Use a flash programmer to write to it.

Table 5.6 Flash Memory (Data flash Block A, Block B) Electrical Characteristics(4)

Symbol	Parameter	Conditions		Stand	ard	Unit
Symbol	Parameter	Conditions	Min.	Тур.	Max.	Unit
_	Program/erase endurance ⁽²⁾		10,000(3)	-	-	times
_	Byte program time (program/erase endurance ≤ 1,000 times)		-	50	400	μS
_	Byte program time (program/erase endurance > 1,000 times)		-	65	_	μS
_	Block erase time (program/erase endurance ≤ 1,000 times)		-	0.2	9	S
_	Block erase time (program/erase endurance > 1,000 times)		=	0.3	-	S
td(SR-SUS)	Time delay from suspend request until suspend		=			μS
_	Interval from erase start/restart until following suspend request		650	-	_	μS
_	Interval from program start/restart until following suspend request		0	-	-	ns
_	Time from suspend until program/erase restart		-	-		μS
-	Program, erase voltage		2.7	_	5.5	V
_	Read voltage		2.2	-	5.5	V
=	Program, erase temperature		-20 ⁽⁸⁾	-	85	°C
_	Data hold time ⁽⁹⁾	Ambient temperature = 55 °C	20	_	-	year

NOTES:

- 1. Vcc = 2.7 to 5.5 V at Topr = -20 to 85°C (N version) / -40 to 85°C (D version), unless otherwise specified.
- 2. Definition of programming/erasure endurance
 - The programming and erasure endurance is defined on a per-block basis.

If the programming and erasure endurance is n (n = 100 or 10,000), each block can be erased n times. For example, if 1,024 1-byte writes are performed to block A, a 1 Kbyte block, and then the block is erased, the programming/erasure endurance still stands at one.

However, the same address must not be programmed more than once per erase operation (overwriting prohibited).

- 3. Endurance to guarantee all electrical characteristics after program and erase. (1 to Min. value can be guaranteed).
- 4. Standard of block A and block B when program and erase endurance exceeds 1,000 times. Byte program time to 1,000 times is the same as that in program ROM.
- 5. In a system that executes multiple programming operations, the actual erasure count can be reduced by writing to sequential addresses in turn so that as much of the block as possible is used up before performing an erase operation. For example, when programming groups of 16 bytes, the effective number of rewrites can be minimized by programming up to 128 groups before erasing them all in one operation. It is also advisable to retain data on the erase count of each block and limit the number of erase operations to a certain number.
- 6. If an error occurs during block erase, attempt to execute the clear status register command, then execute the block erase command at least three times until the erase error does not occur.
- 7. Customers desiring program/erase failure rate information should contact their Renesas technical support representative.
- 8. –40°C for D version.
- 9. The data hold time includes time that the power supply is off or the clock is not supplied.
