

Welcome to [E-XFL.COM](https://www.e-xfl.com)

### Understanding [Embedded - Microcontroller, Microprocessor, FPGA Modules](#)

Embedded - Microcontroller, Microprocessor, and FPGA Modules are fundamental components in modern electronic systems, offering a wide range of functionalities and capabilities. Microcontrollers are compact integrated circuits designed to execute specific control tasks within an embedded system. They typically include a processor, memory, and input/output peripherals on a single chip. Microprocessors, on the other hand, are more powerful processing units used in complex computing tasks, often requiring external memory and peripherals. FPGAs (Field Programmable Gate Arrays) are highly flexible devices that can be configured by the user to perform specific logic functions, making them invaluable in applications requiring customization and adaptability.

### Applications of [Embedded - Microcontroller,](#)

#### Details

Product Status	Active
Module/Board Type	FPGA Core
Core Processor	Artix-7 A35T
Co-Processor	-
Speed	100MHz
Flash Size	32MB
RAM Size	-
Connector Type	50 Pin
Size / Dimension	2.87" x 1.38" (73mm x 35mm)
Operating Temperature	0°C ~ 70°C
Purchase URL	<a href="https://www.e-xfl.com/product-detail/trenz-electronic/te0725-03-35-2c">https://www.e-xfl.com/product-detail/trenz-electronic/te0725-03-35-2c</a>

## TE0725 TRM

Revision: v.65

Exported on: 06/29/2018

## 2 Overview

The Trenz Electronic TE0725 is a low cost small-sized FPGA module integrating a Xilinx Artix-7 (15-100T) and 32 MByte Flash memory for configuration and operation.

Refer to <http://trenz.org/te0725-info> for online version of this manual and the rest of available documentation of the product.

### 2.1 Key Features

- Xilinx Artix-7 XC7A35T (A15 to A100T)
- Commercial Temperature Grade (Industrial on Request)
- 32 MByte Flash Memory
- 2 x 50 Pin Headers with 2,54mm Pitch, Ideal for Breadboard Use
- 87 IOs (42 + 42 + 3)
- 100 MHz System Clock
- I2C EEPROM
- 3.3V Single Power Supply with On-Board Voltage Regulators
- Size 73 x 35 mm
- JTAG/UART Connector
- 2 LED's
- Optional HyperRAM (8 to 32 MByte)
- Optional POF Fiber Optical Adapter (125/250 Mbps)

### 2.2 Block Diagram

### 2.3 Main Components

Note on the images below, that there is no POF transceiver, no 50-pin headers and no JTAG/UART header installed.

1. Xilinx Artix-7 FPGA, U1
2. 32-MByte Flash memory, U7
3. Enpirion EN6347 4A PowerSoC DC-DC step down converter, U10
4. Enpirion EN5311 1A PowerSoC synchronous buck regulator with integrated inductor, U11
5. POF transceiver placeholder, U8
6. 50-pin placeholder for breadboard connector, J1
7. 50-pin placeholder for breadboard connector, J2
8. JTAG/UART connector, JB1
9. Green LED D2(SYSLED) and red LED D3(DONE)
10. 16K x 8 (128-Kbit) serial EEPROM, U2
11. Low-noise, high PSRR, RF, 200-mA low-dropout linear regulator, U9
12. Ultra-low supply-current voltage monitor with optional watchdog, U6
13. Cypress S27KS0641 64-Mbit (8-MByte) HyperRAM™ self-refresh DRAM, U4

## 3 Signals, Interfaces and Pins

### 3.1 I/O Banks

Bank	VCCIO	B2B I/O	Notes
0	3.3V	0	JTAG
14	3.3V	0 (3)	3 I/O in XMOD-JTAG - for use as UART
15	1.8V	0	used for optional hyper RAM
16	2.5V	0	used for optional optical fiber transceiver
34	User select	42	0R resistor option to select 3.3V
35	User select	42	0R resistor option to select 3.3V

### 3.2 JTAG Interface

JTAG access to the Xilinx Artix-7 device is provided through connector JB1.

Signal	Pin Number
TCK	JB1-4
TDO	JB1-8
TDI	JB1-10
TMS	JB1-12

Connector JB1 (2 x 6 pin header) is compatible with XMOD JTAG adapter TE0790. This adapter can be inserted from top onto the TE0725, if JB1 is fitted with male pin header. Optionally JB1 can be fitted with pin header from bottom, in that case the JTAG cable connector must be on the base board. When using XMOD-JTAG in JB1 then additionally USB UART is usable, and the push-button on XMOD works as configuration reset.

Recommended TE0790 (XMOD) DIP-switch settings :

- S2-1: ON
- S2-2: OFF
- S2-3: OFF
- S2-4: OFF

TE0790 can be in some cases used to power up TE0725 (other TE0790 DIP settings), however this is not recommended. TE0790-01 can not supply enough power for TE0725 (LED may blink but the module is not operating properly, especially in case of larger and more sophisticated designs).

### 3.3 POF Transceiver

Model	Bitrate MB/s	Notes
AFBR-59F2Z	250	

### 3.4 On-board LED's

LED	Color	FPGA	Notes
D2	Green	M16	
D3	Red	DONE	Active low

### 3.5 Connectors

All connectors are are for 100mil headers, all connector locations are in 100 mil grid.

LED	Color	FPGA	Notes
D2	Green	M16	
D3	Red	DONE	Active low

## 4 Power and Power-On Sequence

To power-up a module, power supply with minimum current capability of 1A is recommended.

### 4.1 Power Supply

TE0725 needs one single power supply with nominal of 3.3V.

### 4.2 Power Consumption

FPGA	Design	Typical Power, 25C ambient
A35T	Not configured	TBD*
A35T	LED blinking	170mW (typical)
A100T	Not configured	TBD*

\*TBD - To Be Determined.

Actual power consumption depends on the FPGA design and ambient temperature.

### 4.3 Power-On Sequence

There is no specific or special power-on sequence, single power source is needed as VIN, rest of the sequence is automatic.

## 5 Variants Currently In Production

## 6 Technical Specifications

### 6.1 Absolute Maximum Ratings

Parameter	Min	Max	Units	Reference document
3.3V supply voltage	-0.1	3.6	V	
HR I/O banks supply voltage (VCCO)	-0.5	3.6	V	Xilinx datasheet <a href="#">DS181</a>
HR I/O banks input voltage	-0.4	VCCO + 0.55	V	Xilinx datasheet <a href="#">DS181</a>
Storage Temperature	-40	+85	°C	

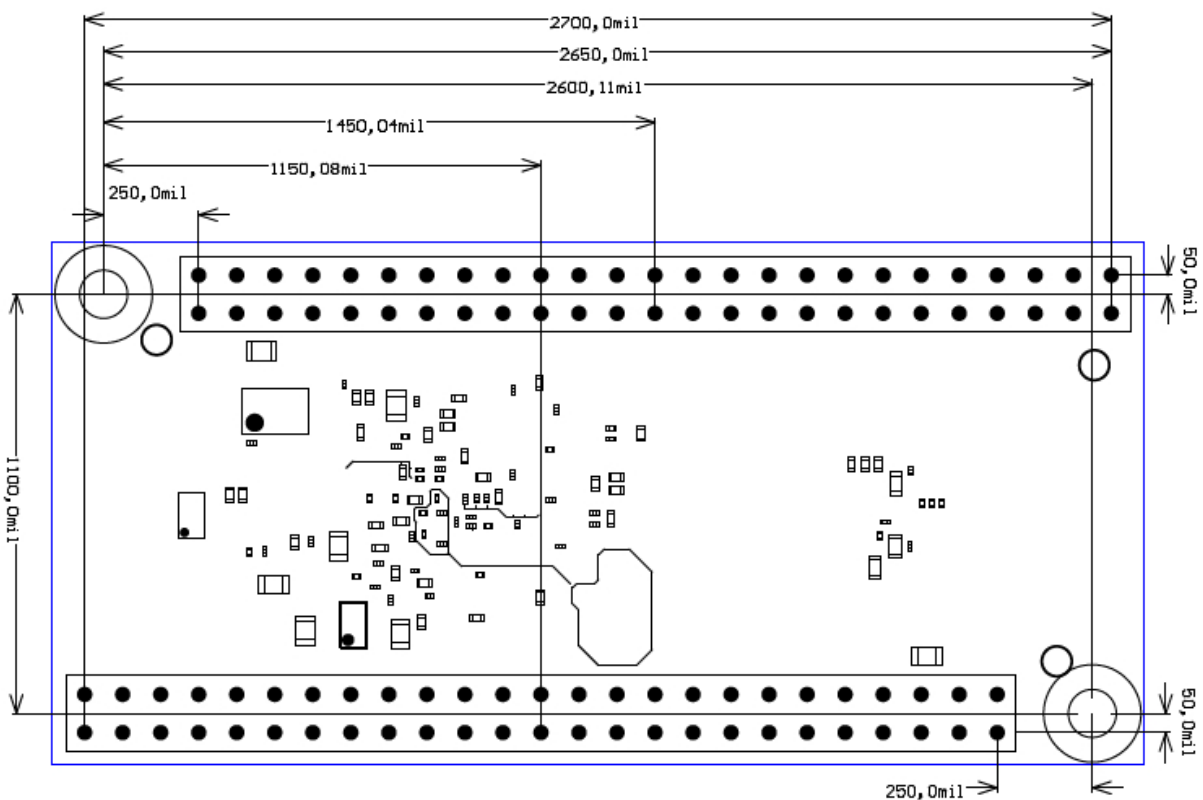

### 6.2 Recommended Operating Conditions

Parameter	Min	Max	Units	Reference document
VIN supply voltage	3.135	3.45	V	
HR I/O banks supply voltage (VCCO)	1.14	3.465	V	Xilinx datasheet <a href="#">DS181</a>
HR I/O banks input voltage	-0.20	VCCO + 0.20	V	Xilinx datasheet <a href="#">DS181</a>
Operating Temperature	0	+85	°C	

 Please check Xilinx datasheet DS181 for complete list of absolute maximum and recommended operating ratings for the Artix-7 device.

### 6.3 Physical Dimensions

Please note that two different units are used on the figures below, SI system millimeters (mm) and imperial system thousandths of an inch (mil). This is because of the 100mil pin headers used, see also explanation below. To convert mils to millimeters and vice versa use formula  $100\text{mil's} = 2,54\text{mm}$ .

All 100 mil pin headers are in 100 mil grid, the M3 mounting holes are in 50 mil grid aligned to the centers of the 100mil headers. The module is symmetrical, turning it 180 degrees will keep all I/O and Power pins in both 50 pin headers in compatible places.

## 6.4 Operating Temperature Ranges

### Commercial grade modules

All parts conform to at least commercial temperature range of 0°C to +70°C.

**Industrial grade modules**

All parts are at least industrial temperature range of -40°C to +85°C.

The module operating temperature range depends on customer design and cooling solution. Please contact us for options.

## 7 Revision History

### 7.1 Hardware Revision History

Date	Revision	Notes	PCN	Documentation Link
2016-12-09	03	Second production release	Click to see PCN	<a href="#">TE0725-03</a>
-	02	First production release		<a href="#">TE0725-02</a>
-	01	Prototypes		

Hardware revision number is printed on the PCB board together with the module model number separated by the dash.

### 7.2 Document Change History

## 8 Disclaimer

### 8.1 Data privacy

Please also note our data protection declaration at <https://www.trenz-electronic.de/en/Data-protection-Privacy>

### 8.2 Document Warranty

The material contained in this document is provided “as is” and is subject to being changed at any time without notice. Trenz Electronic does not warrant the accuracy and completeness of the materials in this document. Further, to the maximum extent permitted by applicable law, Trenz Electronic disclaims all warranties, either express or implied, with regard to this document and any information contained herein, including but not limited to the implied warranties of merchantability, fitness for a particular purpose or non infringement of intellectual property. Trenz Electronic shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein.

### 8.3 Limitation of Liability

In no event will Trenz Electronic, its suppliers, or other third parties mentioned in this document be liable for any damages whatsoever (including, without limitation, those resulting from lost profits, lost data or business interruption) arising out of the use, inability to use, or the results of use of this document, any documents linked to this document, or the materials or information contained at any or all such documents. If your use of the materials or information from this document results in the need for servicing, repair or correction of equipment or data, you assume all costs thereof.

### 8.4 Copyright Notice

No part of this manual may be reproduced in any form or by any means (including electronic storage and retrieval or translation into a foreign language) without prior agreement and written consent from Trenz Electronic.

### 8.5 Technology Licenses

The hardware / firmware / software described in this document are furnished under a license and may be used / modified / copied only in accordance with the terms of such license.

### 8.6 Environmental Protection

To confront directly with the responsibility toward the environment, the global community and eventually also oneself. Such a resolution should be integral part not only of everybody's life. Also enterprises shall be conscious of their social responsibility and contribute to the preservation of our common living space. That is why Trenz Electronic invests in the protection of our Environment.

### 8.7 REACH, RoHS and WEEE

#### **REACH**

Trenz Electronic is a manufacturer and a distributor of electronic products. It is therefore a so called downstream user in the sense of [REACH](#). The products we supply to you are solely non-chemical products (goods). Moreover and under normal and reasonably foreseeable circumstances of application, the goods supplied to you shall not release

any substance. For that, Trenz Electronic is obliged to neither register nor to provide safety data sheet. According to present knowledge and to best of our knowledge, no [SVHC \(Substances of Very High Concern\) on the Candidate List](#) are contained in our products. Furthermore, we will immediately and unsolicited inform our customers in compliance with REACH - Article 33 if any substance present in our goods (above a concentration of 0,1 % weight by weight) will be classified as SVHC by the [European Chemicals Agency \(ECHA\)](#).

#### **RoHS**

Trenz Electronic GmbH herewith declares that all its products are developed, manufactured and distributed RoHS compliant.

#### **WEEE**

Information for users within the European Union in accordance with Directive 2002/96/EC of the European Parliament and of the Council of 27 January 2003 on waste electrical and electronic equipment (WEEE).

Users of electrical and electronic equipment in private households are required not to dispose of waste electrical and electronic equipment as unsorted municipal waste and to collect such waste electrical and electronic equipment separately. By the 13 August 2005, Member States shall have ensured that systems are set up allowing final holders and distributors to return waste electrical and electronic equipment at least free of charge. Member States shall ensure the availability and accessibility of the necessary collection facilities. Separate collection is the precondition to ensure specific treatment and recycling of waste electrical and electronic equipment and is necessary to achieve the chosen level of protection of human health and the environment in the European Union. Consumers have to actively contribute to the success of such collection and the return of waste electrical and electronic equipment. Presence of hazardous substances in electrical and electronic equipment results in potential effects on the environment and human health. The symbol consisting of the crossed-out wheeled bin indicates separate collection for waste electrical and electronic equipment.

Trenz Electronic is registered under WEEE-Reg.-Nr. DE97922676.
